

# SECULYZE

PRECISION SECURITY ENGINEERING

Cybersecurity is crucial for businesses today. Seculyze SaaS for **Microsoft Sentinel** and **Defender** reduces the risk of cyberattacks by up to 80% by removing irrelevant alerts and prioritizing the rest. Enhance your detection and response capabilities with our solution. We optimize costs, empower SOC/MDR teams with actionable recommendations, and return control while upskilling the team.

MADE FOR  
MICROSOFT

## KEY CHALLENGES

**27%**

of security alerts end up ignored according to IDC

**+ 90%**

of all alerts are false positives across customers

**> 4.000.000**

is the growing shortage of security workforce

## SECULYZE SOLUTION

### CALIBRATE

Automatically optimize SIEM/MDR setup after best practices

Increase security posture while removing 10% Sentinel/Defender costs

### TUNE

Reduce alert noise by proprietary ML/AI algorithm

Tune out 82 - 94% of your false positives freeing valuable analyst time

### ENRICH

Add detailed threat intelligence to dynamically prioritize alerts

Improved prioritization and reduced time-to-respond focusing on high risk alerts

"Seculyze transformed our SOC alarm handling. Highly recommend!"
