Today's organizations face a unique set of cybersecurity challenges

Changing threats

- Threat actors are continually evolving to bypass existing defenses.
- Breaches can be both reputationally and financially devastating.
- Changing threats also means shifting compliance requirements.

Complex systems

- Organizations are moving from on-premises networks to the cloud.
- Legacy applications get mixed in with new solutions.
- Patchwork security solutions increase complexity and worsen coverage.

Cybersecurity skills gaps

- It's difficult to find and retain qualified cybersecurity professionals.
- SMBs do not have the budget to support an in-house SOC.
- Professionals need continuing education to stay current on strategies.

Onesec 24/7 Managed Security Operation Services brings together everything you need for powerful end-to-end security

Consultancy

- Analyze your business, your current digital ecosystem, and your needs.
- Develop a plan to cover potential gaps and risks.
- Align your organization to relevant compliance standards.
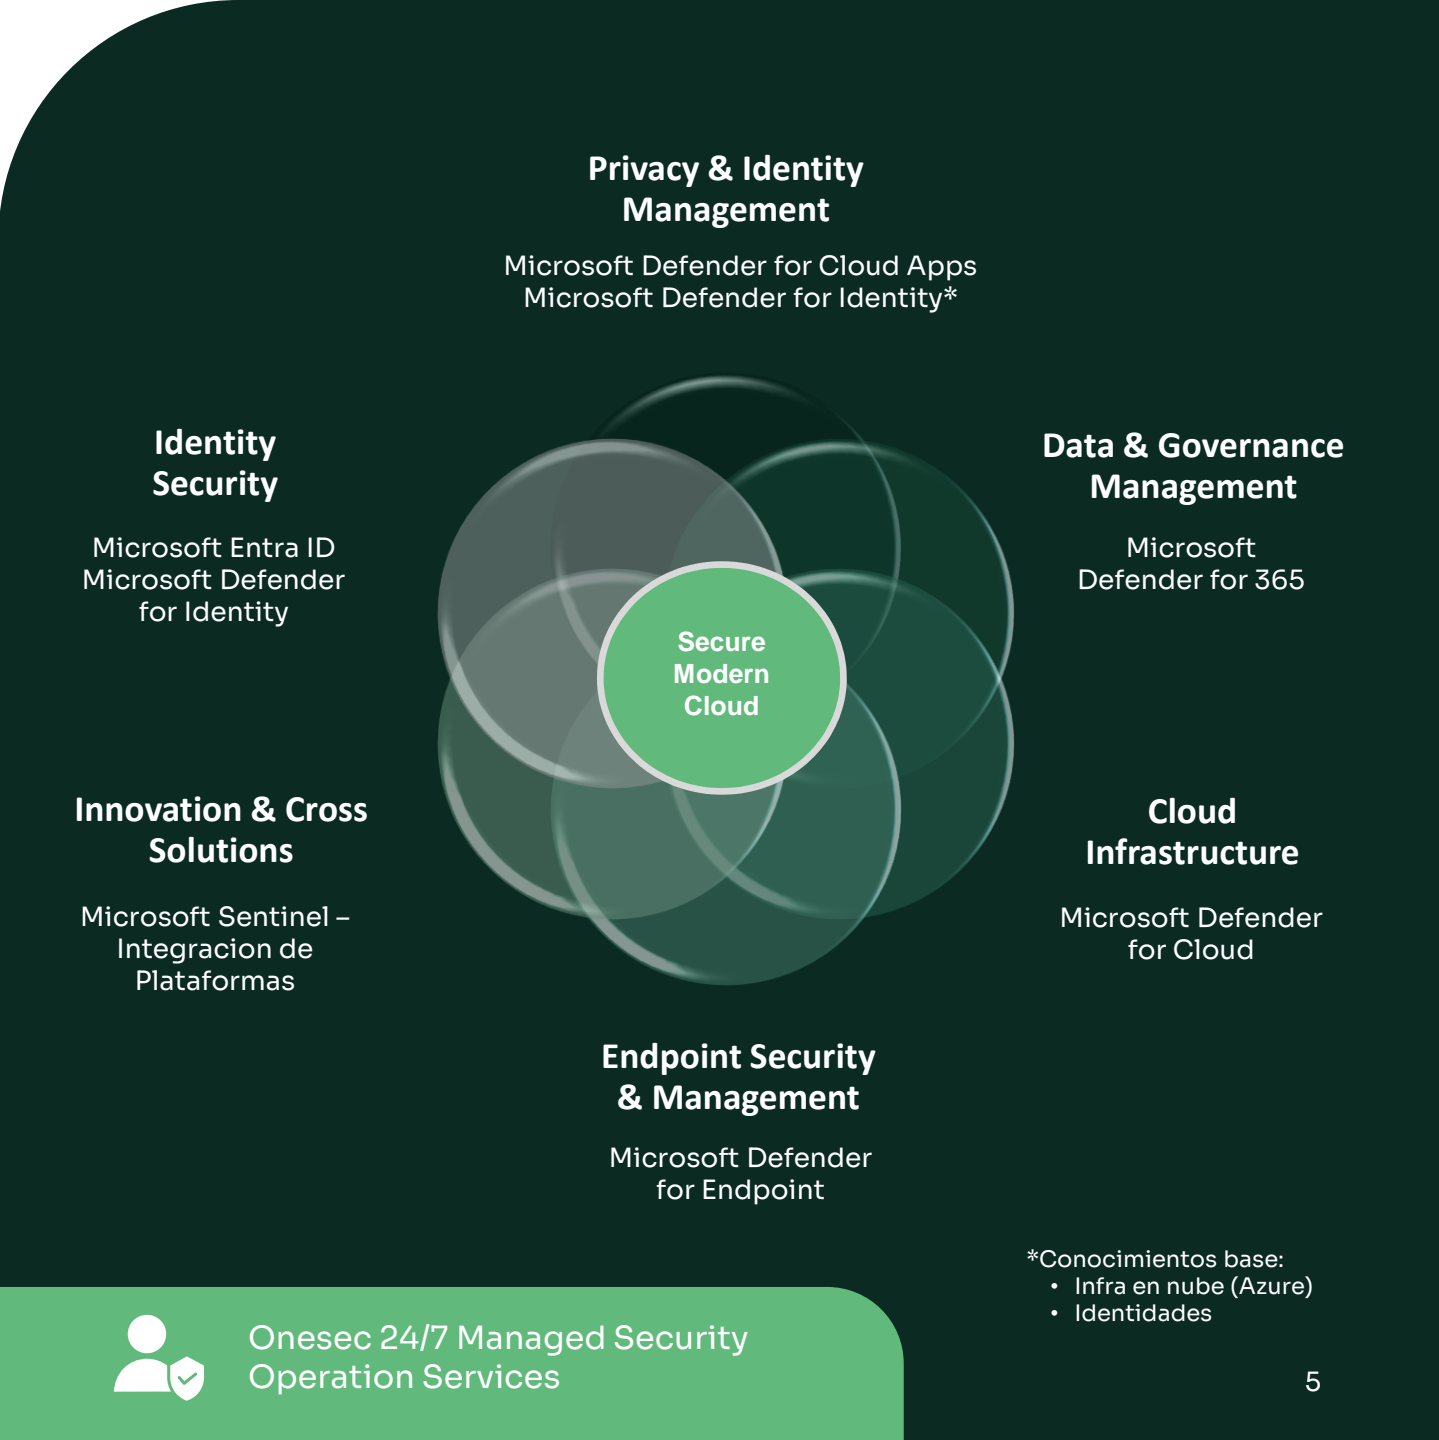

Implementation of technology

- Get expert support in configuring your Microsoft Security solutions.
- Streamline coverage with managed security services already integrated with your Microsoft solutions.
- Ensure continued comprehensive coverage as you evolve over time.

Ongoing management

- Augment your in-house team with a 24/7/365 expert SOC.
- Swiftly detect, contain, and mitigate cyber threats.
- Proactively hunt for and eradicate new threats.

Ensure your Microsoft Security solutions are optimized for you

Work with a team of Microsoft experts to configure your Microsoft Sentinel and Microsoft Defender XDR solutions to support the most efficient coverage and rapid response to threats.

Onesec 24/7 Managed Security Operation Services

# Strengthen defenses with consultations from security experts

Work with seasoned professionals

Consult with cybersecurity specialists who combine their rigorous training and industry-leading certifications with extensive field experience.

Analyze your current posture

Receive an in-depth analysis of your cybersecurity posture.

Develop a roadmap for configuring Microsoft Sentinel and Microsoft Defender XDR to ensure complete security coverage.
Implement efficient and effective technology solutions

Confidently configure your Microsoft Security portfolio

- Optimize your Microsoft Sentinel and Microsoft Defender XDR product portfolio to provide complete visibility and coverage.

Refine your setup as you grow

- After initial implementation, Onesec's Managed Detection and Response team will continue to uncover and mitigate emerging risks.

Leverage and align with relevant security frameworks

- ISO/IEC 27035
- NIST Cybersecurity Framework
- CIS Security Controls in a 3-level Tier operation

Analyze the organization

Gather information from the organization, to have an understanding of the business operation.

Implementation of the tools

Implementation of security solutions in the client's tenant (Azure and Office 365): This ensures that client data remains safe and in their custody, while allowing Onesec delegated access for direct and remote management capabilities.

Discover vulnerabilities

With the collection of information, the security vulnerabilities that the client has must be detected, which will be addressed later during the execution and administration of the project.

Risk discovery

Declare the risks associated with the organization's assets, in terms of security associated with the objects analyzed and based on the vulnerability analysis obtained.

Recommend action plan

Apply the security recommendation through the various cyber security platforms in order to address the identified risks.

Operation daily

Manage the various cyber security platforms, which will help to proactively control the security of the business.

Support continuous security with ongoing management
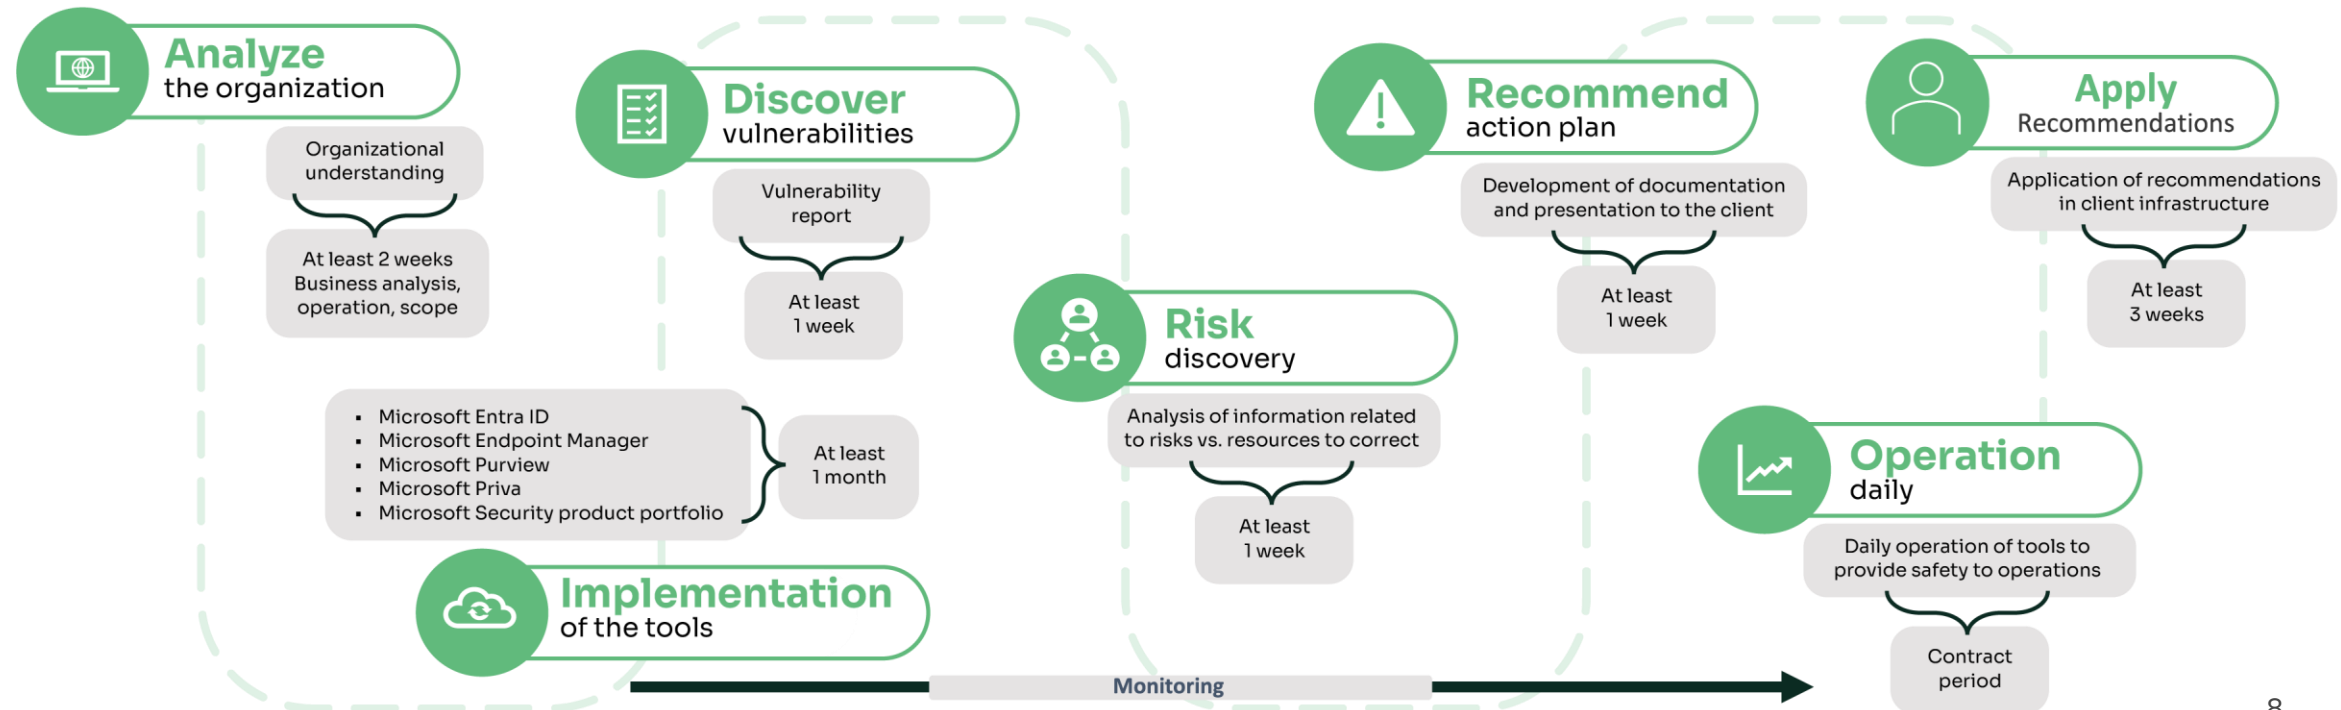

Get expert support without breaking your budget

- 24/7/365 SOC providing managed detection and response services.
- Respond rapidly to threats with alert triaging and investigation and remote response.

Stay ahead of emerging threats

- Threat hunting
- Threat eradication
- Threat intelligence

Stay in the loop but not overwhelmed

- Offload the bulk of alert investigations to Onesec's SOC and only receive escalations and notifications as appropriate.

Analyze the organization

Organizational understanding

At least 2 weeks Business analysis, operation, scope

Discover vulnerabilities

Vulnerability report

At least 1 week

- Microsoft Entra ID
- Microsoft Endpoint Manager
- Microsoft Purview
- Microsoft Priva
- Microsoft Security product portfolio

At least 1 month

Implementation of the tools

Risk discovery

Analysis of information related to risks vs. resources to correct

At least 1 week

Recommend action plan

Development of documentation and presentation to the client

At least 1 week

Apply Recommendations

Application of recommendations in client infrastructure

At least 3 weeks

Operation daily

Daily operation of tools to provide safety to operations

Contract period
