

Threatspy Heuristic AppSec Management Platform

Threatspy, is a state-of-the-art SaaS-based platform enables developers and security engineers to proactively manage known, unknown, and third-party vulnerabilities in their applications through automation of detection, prioritization, and remediation process while predicting upcoming Threats.

Applications remains at Higher Risk due to underlying & uncheck Vulnerabilities

- 84%** Vulnerabilities are located in the Third Party Library
- 77%** Reported Third Party Vulnerabilities don't get fixed even in 3 Months
- 90%** Of Scanned Apps are still vulnerable due to longer remediation process
- 79%** Of third party libraries are never updated after including them in codebase

ABOUT US

Secure Blink provides automated application and API security solutions that empower developers and security engineers to protect critical assets from exploitation.

MISSION

Our mission is to empower organizations to proactively secure their applications & APIs using our cutting-edge heuristic approach.

VISION

Our vision is to establish ourselves as the leading security standard for Application & API Development.

THREATSPY OFFERINGS

Vulnerability Management

- Heuristic Scanning Approach
- Two scans: Light and Deep
- OWASP Top 10
- S3 Bucket, Cors Issue and DNS Misconfiguration
- Prioritization on Reachability
- Zero day Vulnerability Detection
- Agentless Methodology

Version Management

- Automated Remediation Playbooks
- Mitigation Campaign
- API Access
- Analytics & Reporting
- Workflow Integration (Slack, Jira, & Webhooks etc)
- DevSecOps integration (Jenkins, Travis, Gitlab etc)

Application HealthBot

- Advance Threat Prediction
- App Security Posture Monitoring
- Support Leading Stack
- User Access & Security

DISCOVERY TO REMEDIATION WITHIN 5 STEPS PROCESS
