SECURE FUTURE

Microsoft Security

Protect
everything

Simplify
the complex

Catch
what others miss

Grow
your future

Know and protect sensitive data wherever it is

An intelligent, built-in, extensible solution for data protection

Cloud

On-premises

→ Discover and classify data at scale using automation and Machine Learning

→ Built-in labeling and protection experience

→ Platform extends the protection experience

→ Encryption built into Microsoft 365 and Azure: at rest, in transit, and in use

Address compliance risks head on

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used, and compliance risks that may exist.

Discover Sensitive Data Workshop gives you the insights you need to better discover, protect, and govern your corporate data.

Understand the hidden compliance risks of dark data

Assess your organization's dark data risks with Data Risk Check

Assess your environment against key data protection standards and regulations.

Receive an analysis and report on findings and associated risks

Learn about tools and services that can mitigate risks

Explore recommendations and next steps

SECURE FUTURE

Discover Sensitive Data

The Discover Sensitive Data Workshop provides a summary of an organization's data protection and compliance stature and recommendations to improve data protection and compliance.

1 Document your compliance objectives and strategy including compliant Teams deployment and use

2 Show how to understand, mitigate, and protect against potential privacy and regulatory risks from dark data

3 Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies.

Provide actionable next steps based on your needs and objectives
