- Deployment of services on Cloud Run
- AI models: Access via AI Platform (GCP)

SECURITY POLICIES AND PROTOCOLS

- Crisis Management and BCP/DRP (Business Continuity Plan/Disaster Recovery Plan)
- Vulnerability Management
- Software Development Life Cycle (SDLC)
- Data Backup
- Data Protection, Classification, and Deletion

Corporate Social Responsibility (CSR)

Before...  **Inclusion of dyslexic individuals.**

Over 780 million dyslexic adults worldwide face concentration challenges during their meetings.

 **After**

Dyslexic individuals can dedicate their full concentration to the conversation.

Before...  **Inclusion of individuals with hearing impairments**

Over 1.5 billion hearing-impaired individuals worldwide face challenges during remote meetings.

Hearing-impaired individuals can have a better experience during their remote appointments.

Before...  **Reduction of digital pollution**

Sending 10 emails per day for 1 year (equivalent to 3650 emails) results in 14.6 kg of CO2 emissions. Half of the exchanged emails are clarifications of previous communications.

Reducing environmental impact and digital pollution through the use of Google's Green Clean Cloud technologies (partner of our solution).

The intelligent assistant that transcribes and summarizes all your meetings in 1 click.
