

# Microsoft 365 Cloud Accelerator Experience

A Cloud Accelerator Experience (also known as a Customer Immersion Experience) is a hands-on introduction to Microsoft's suite of productivity tools. This true-to-life user experience takes you through everyday business situations, such as working remotely, analyzing sales data, and collaborating with co-workers, and it lets you see first-hand how Microsoft 365 products make work easier, more convenient, and more secure.

These experiences are led by a Microsoft Certified Facilitator and are customized to allow attendees to explore at their own pace and focus on first-hand experience. Overall, the workshop offers an interactive environment designed to be engaging, informative, and fun!

The best part is that all products are set up and configured with fictional personas and data, allowing the simulation of real-life scenarios, so there's no need to worry about installing anything on your own devices, or messing with your own files.

A Cloud Accelerator Experience is a great way to get your hands into the Modern Workplace tools including Microsoft Teams, SharePoint Online, OneDrive for Business, and more in an interactive space.

## Benefits of a Cloud Accelerator Experience

- Take a tour in a virtual "sandbox" hands-on environment
- Explore and discover the capabilities of the Microsoft 365 platform
- Reveal opportunities and benefits of advanced features and applications
- Unlock the potential for line of business stakeholders

**Seer Strategic Solutions** is your premier Microsoft partner for aligning a digital transformation initiative to your people and business processes.

Our services follow a proven framework for adoption and change management (ACM) to drive these outcomes:

- Increase employee satisfaction, learning, product usage, and productivity
- Mitigate the risks of implementation
- Maximize the ROI of your SaaS subscriptions
