

Invent 365: Your Strategic Path to Digital Transformation with Microsoft's Cloud Platform

A two-week program by Seer, is designed to help you define and harness the value of the Microsoft Cloud

An inclusive approach involving workshops, stakeholder interviews, and strategic planning to create a roadmap tailored for your business

Here are the top three ways Seer can engage with your business during Invent 365:

Comprehensive Assessment

Customized Workshops

Strategic Roadmap Development

Seer's Enablement and Adoption Services with Invent 365

Comprehensive Assessment

Evaluate your existing environment and Microsoft 365 capabilities to identify key improvement areas and integration opportunities for optimal use of Microsoft 365.

Customized Workshops

Interactive, tailored sessions to determine the most relevant Microsoft 365 use cases for your business, setting clear success criteria for effective implementation.

Strategic Roadmap Development

Craft a step-by-step implementation plan for Microsoft 365, focusing on achieving both immediate and long-term business goals in a phased, strategic manner.

The value of cloud technology and artificial intelligence can be found in these areas of need, what Microsoft calls the “Four Pillars” of Digital Transformation
