SEGMENT

What is Azure Virtual Desktop (WVD)

Azure Virtual Desktop is a desktop and app virtualization service that runs in Azure cloud.

It is designed for virtualizing desktop infrastructure and remote desktop session host management.

It gives users the ability to access their resources from any device with internet connection.

Because of the Windows virtual desktop is an Azure service it gives the possibility of high availability, scalability and security.

SEGMENT

What does Azure Virtual Desktop offer

Cost saving – The new multi-session Windows 10 reduce the number of virtual machines and is fully scalable.

Access - Easy way to access your resources.
