

# Rapid adoption of Copilot for Microsoft 365

Working on rapid adoption helps the success of the use of technology. Copilot for Microsoft 365 is a new technology with which our workers can be more efficient with correct adoption, training and continuous support.

This can help increase productivity and achieve better results in your projects.

## WHAT WE OFFER

Training users to interact with Copilot and the development of new skills.

Scenario support  
Continuous post-training support and accompaniment to work with the identified scenarios.

ROI Calculation, Final Report and Next Steps  
Evaluation of the impact obtained in improving work and saving time.

## WHAT OUR CUSTOMERS ARE SAYING

The path with our work is to make responsible use of artificial intelligence and we achieve this with Conpilot for Microsoft 365
