# Overview

- ✦ With Azure Security Assessment, your organization's Azure resources protection will be examined. Useful insights will be delivered for you to act upon and improve your security posture
  - ✦ Act upon recommendations to bring your security posture to industry best-practice grade
  - ✦ Design and implement a security strategy with best-matched solutions
  - ✦ The assessment will take ~4 weeks, will not affect your organization's users.
  - ✦ Collected data will represent a full month of work to cover most common scenarios in your organization
  - ✦ Typical stages for the assessment:
    - Scope of Work Definition
    - Human Data Collection – discussions with relevant stakeholders
    - Automated Data Collection – harvesting events and data for a time period
    - Report Compilation – our security team distills and extracts useful insights and work plan
    - Conclusions – report presentation and discussion of planned activities and priorities
-
