Modern Work    Digital & App Innovation Azure    Infrastructure Azure    Data & AI Azure

We are at your service!

# AZURE IMPLEMENTATION SERVICE

Purchasing a license is just the first step, as virtual environments and operating systems can surprise you with their architecture.

[www.microsoft365.senetic.net](http://www.microsoft365.senetic.net)

The setup service is a **time-saver and an excellent alternative for companies that do not have an in-house IT department**. You take care of the development of your business, and we will **quickly and efficiently implement Azure cloud solutions in your company** and provide you with the knowledge of how to use them.

Our offer is aimed at companies that would like to start their transformation to the public cloud, want to move their IT environment efficiently and effectively and fully exploit the potential of the cloud in their organisation.

Our work starts at the consultation stage of selecting solutions from the Azure portfolio and we accompany you on your journey through the full commissioning process. **Use our expertise to grow your business with a professionally implemented, state-of-the-art cloud infrastructure.**

## How do we work?

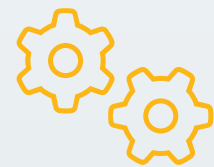

### With your needs in mind

We have an individual approach to each client. You can choose a ready-made range of configurations or a customized approach depending on the requirements and functionality necessary for your organization.

### Comprehensively

We offer you a comprehensive service: in one place you can order Microsoft solutions and personalized configuration and you do not have to search for other subcontractors.

### Effectively

We have vast experience, the necessary know-how and skills to carry out the service efficiently and effectively. That's more than 13 years of being on the market and gaining competence.

# What is included in the “AZURE DEPLOYMENT” package?

We support companies in a **secure transition to the Azure cloud**, providing them with a **fully operational and correctly configured environment**. We perform the technical configuration of the infrastructure taking into account all security requirements.

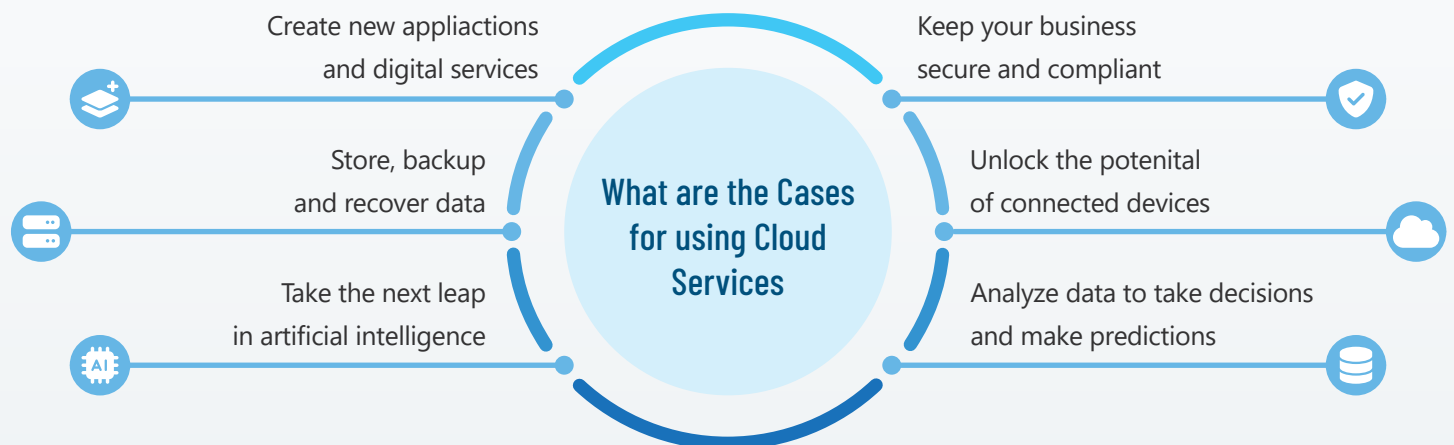

## The offer includes the following activities:

- jointly determining the configuration needs of the Azure environment
- setting up an Azure subscription
- assigning access to the right people in your organisation
- preparation of VNet, Subnets, Gateway resources
- implementation of IPSec tunnel
- configuration of local gateway
- configuration of remote gateway
- setting up the correct selectors
- configuration of the edge device
- AdConnect preparation
- configuration of the virtual machine for the AdConnect service
- configuration of the AdConnect application
- verification of correct object synchronisation
- final implementation verification

## What do you get?

- A fully functional MS Azure environment ready to go;
- you can benefit from the security used by major companies and institutions from around the world;
- access to all services offered by Microsoft Azure; you have the possibility to run virtual machines, SQL databases, backups;
- the ability to create both the simplest and most complex IT environment;
- a platform fully tailored to the individual needs of each company, for both production and test environments.

# How does the process work?

1. After purchase, you will receive a proforma invoice in accordance with your terms and conditions.
2. After payment of the proforma within 5 working days a dedicated Project Manager will contact you.
3. You and the Project Manager will agree on a dedicated person to make decisions about implementation on your side.
4. We will ask you to provide the information necessary for implementation (logins, passwords, etc., environmental information) in a secure manner.
5. Our team will analyze and verify the completeness of the information provided.
6. The Project Manager will contact you to set up an implementation date.
7. You will receive an implementation schedule with the responsibilities of the parties.
8. Our engineer starts the implementation of the selected service.
9. We will perform internal tests to verify the correctness of the work done.

**NOTE:** If you would like to train your team on how to use the tools, let us know!  
We will be happy to share our knowledge.
