

We are at your service!

INTEGRATION OF VIVA LEARNING WITH SHAREPOINT

Viva Learning – develop your team with access to a training platform where you will find an extensive library of courses from a variety of providers. Users can share their courses and demonstrate progress, making your employees' development a part of the daily office routine.

Integrate Viva Learning with SharePoint – properly integrating the two solutions allows an organisation to track employee development, recommend valuable content to the team and manage learning goals for the whole company. It is also a space where you can share your own internal training resources, giving you one central place to manage corporate development and learning.

Our integration service saves time and is an excellent alternative for companies that do not have their own IT department. You take care of the development of your business, and we will quickly and efficiently implement solutions in your company and provide you with the knowledge of how to use them. Correctly configured tools provide the guarantee that the solutions will be used to their full potential and they will boost productivity in the organization.

We start our work at the consultation stage of license selection and accompany you on your journey through the full commissioning process. Make use of our knowledge and experience to grow your business with professionally implemented, state-of-the-art IT systems.

How do we work?

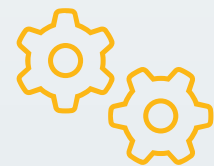

With your needs in mind

We have an individual approach to each client. You can choose a ready-made range of configurations or a customized approach depending on the requirements and functionality necessary for your organization.

Comprehensively

We offer you a comprehensive service: you can order Microsoft solutions and personalized configuration in one place and you do not have to search for other subcontractors.

Effectively

We have vast experience, the necessary know-how and skills to carry out the service efficiently and effectively. That's more than 13 years of being on the market and gaining competence.

What is included in the **„INTEGRATION OF VIVA LEARNING WITH SHAREPOINT“** package?

The professional integration of Viva Learning with SharePoint allows you to take full advantage of the possibilities offered by the Microsoft training platform.

As part of this service, we provide a range of activities that will enable you to effectively launch key features.

1. Configuration of the organisation's resources with the SharePoint service.
2. Configuration of Microsoft 365 groups and permissions.
3. Configuration of the SharePoint learning site and user permissions.

How does the process work?

1. After purchase, you will receive a proforma invoice in accordance with your terms and conditions.
2. After payment of the proforma, you will be contacted by a dedicated Project Manager within 5 business days.
3. You and the Project Manager will agree on a dedicated person to make decisions about implementation on your side.
4. We will ask you to provide the information necessary for implementation logins, passwords, information about the environment, etc. in a secure manner.
5. Our team will analyze and verify the completeness of the information provided.
6. The Project Manager will contact you to set up an implementation date.
7. You will receive an implementation schedule with the responsibilities of the parties.
8. Our engineer starts the implementation of the selected service.
9. We will perform internal tests to verify the correctness of the work done.

NOTE: If you would like to train your team on how to use the tools, let us know!
We will be happy to share our knowledge.
