Solution Overview

Sensei
PROJECT SOLUTIONS

Industry Standards & Best Practices PPM

The Sensei solution is a pre-configured, **Best Practices** PPM solution that is compliant with PMI® **industry standards** and aligned with best practice PPM recommendations from Gartner, supporting both traditional and agile projects.

It includes a comprehensive set of **role-based reports, dashboards, and governance workflows** and includes a data warehouse for reporting on related data in your Line of Business (LoB) systems.

It aims to meet most of your core requirements covering **end-to-end project and portfolio management from project intake through execution.** It enables rapid deployment with full functionality that fits most organisations and is the fastest, most cost-effective way to kick-start your PPM initiative.

Sensei provides **continuous and evolving innovations** through updates and new features to keep your PPM solution current with industry trends and take advantage of improvements from Microsoft.

It facilitates **trustworthy data** in your PPM solution so you can focus on variances and exceptions and get the right projects successfully delivered, in a consistent manner.

Sensei PROJECT SOLUTIONS

Cost Effective

A fraction of the cost of traditional “blank canvas” deployments. Continued enhancements as part of subscription.

Auto Compliance

Automated Governance and Compliance reports monitor data quality and how well the organisation is adopting PPM. processes.

Rapid Deployment

Fully functionating PPM environment deployed with projects and resources loaded within a matter of weeks rather than months.

Proven Success

Industry standards and best practices are fully embedded into your PPM environment ready to go for your consumption.

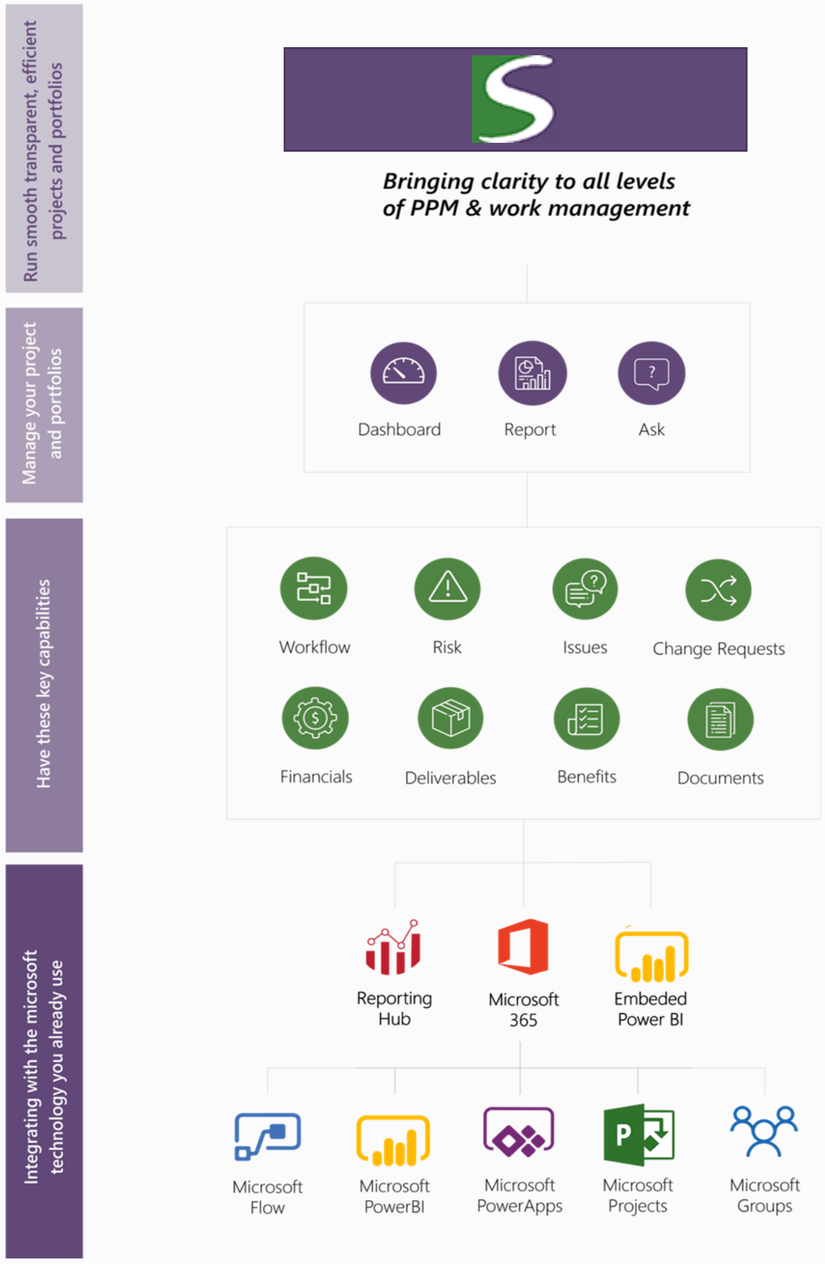
Scalable

Supports small teams and easily scales to a complete enterprise deployment supporting all levels of maturity.

Instant ROI

Demonstrates the Microsoft PPM value proposition to Executive Management and enables immediate ROI.

Sensei PROJECT SOLUTIONS



Sensei PROJECT SOLUTIONS

Sensei Building Blocks of PPM

Project Intake & Prioritisation

Enable Executives to get an overview of incoming proposals with work and cost estimates; and show all projects and their relative priority in the portfolio.

- Project Prioritisation
- Portfolio Management

Resource Capacity/Demand Management

View the true utilization of resources by role, team and department and easily see which projects are requesting and consuming resources.

- Resource Management
- Timesheets and Task Updates

PMO Governance

Track compliance to project management and scheduling standards and ensure better data quality throughout the Microsoft PPM environment.

- Process Governance

Budgeting & Cost Tracking

Get a portfolio-level view of cost performance against budget and original baselines. Track spending by cost type and monitor variances.

- Project Financial Management

Project Planning & Collaboration

Monitor progress throughout the project lifecycle and understand active risks and issues, action items, deliverables, and missed deadlines across the portfolio.

- Project Management
- Schedule Management
- Team Collaboration
- Risk Management
- Document Management
- Issue Management

Project Status & Portfolio Reporting

Track portfolio performance with Key Performance Indicators and facilitate easy access to detailed project status information and SharePoint project site data.

- Reporting and dashboards
- Project Management
