# SENSELY

# Increasing Access.
# Lowering Costs.
# Improving Health.

A character-based voice-enabled platform that introduces an *always* on connection between enterprises and their insurance plan members, patients, or employees.

Available for easy integration into existing enterprise websites, mobile apps, or chat channels, Sensely features engaging and elegant health & insurance services. With Sensely, enterprises can enhance user experience, elevate brand preference, and influence behavior

## OFFERING A POWERFUL SUITE OF THE MOST REQUESTED APPLICATIONS

**Symptom Checker**, featuring content from world-renowned Mayo Clinic

**Health Risk Assessment (HRA)**, for life/health insurance underwriting, for preventative healthcare

**Front Door Navigator**, to quickly address the most common end user requests

**Remote Monitoring**, leverage the power of frequent check-ins to provide more proactive support to patients with chronic conditions

Supporting over 30 languages, Sensely enables the seamless provision of multilingual solutions to multinational audiences.

## HOW SENSELY WORKS WITH YOU

Through an initial intake and a workshop with your team, Sensely will learn about your operational processes, your goals, and your expected integration points.

Then we work together to design and build a user experience that your stakeholders will love.

Depending on project complexity, your Sensely-powered solution can be up and running, and creating value, in as little as one month.

You also receive access to Sensely's Conversation Design team, allowing you to create a continuous flow of enhancements unique to your organization, so that the system's benefit grows over time.

Learn more at www.sensely.com or email us at info@sensely.com

## KEY BENEFITS
