SENTEON

CIS Center for Internet Security®

Senteon: Unifying Security and Compliance

Propel your security posture to new heights - all with the ease of a single click.

Senteon Solution - Amplified Security made Simple

At the intersection of advanced technology and cybersecurity best practices, Senteon emerges as a game changer. Our solution maps CIS benchmarks to multiple regulatory frameworks, enabling robust, yet simple, compliance implementation. Our engagement with Win32 APIs ensures efficient and secure control of your systems - all at a near-perfect success rate.

Key Product Capabilities

Streamline Security and Compliance

- **Effortless Setup:** Seamlessly integrate and deploy CIS benchmarks across all your systems, fortifying your cybersecurity defenses within a few straightforward steps.

- **Powerful Control:** Gain command over endpoint change histories, report generation, system-wide configuration changes, and drift alerts for a comprehensive cybersecurity management.

- **Tailored Recommendations:** Senteon's learning phase identifies non-disruptive CIS Benchmarks, assuring business continuity while advancing your cybersecurity posture.

- **Real-Time Compliance Monitoring & Change Tracking:** Every configuration change is logged, recorded, and tracked in real-time - offering an unrivaled transparency and audit readiness.

Key Benefits

Fortify your defense mechanisms with our personalized, data-driven strategies

Align your systems effortlessly with multiple regulatory frameworks for comprehensive compliance

Implement CIS benchmarks non-disruptively, maintaining your operations while upgrading your security

Get invaluable insights on potentially disruptive settings, allowing you to make proactive, informed cybersecurity choices

Bolster your security with our single-click implementations, simplifying the hardening process

Stay audit-ready with our real-time change tracking, ensuring you always have proof of your cybersecurity efforts at hand

MSP's Challenges Resolved with Senteon

Challenge 1: Seamless Business Continuity
Senteon is a game-changer, smartly identifying non-disruptive CIS Benchmarks to maintain an optimally secure and uninterrupted business flow.

Challenge 2: Efficient Implementation
Senteon simplifies the MSP's security hardening journey across every tenant, with our advanced technology offering single-click deployments, ensuring consistency, scalability, and increased productivity.

Challenge 3: Comprehensive Compliance Made Simple
MSPs can enjoy comprehensive compliance made simple with Senteon. Our system aligns all CIS benchmarks with major regulatory standards, while our real-time tracking ensures audit-ready transparency, thus enhancing efficiency and ease of use.

Read what our Senteon Product Board Member has to say

Senteon has been a huge timesaver. We don't have to manage settings with Group Policy / Intune / RMM. We have one simple interface to manage all our settings to meet the CIS Benchmarks for hardening.
