FortisX™ Next Generation Cyber Detection & Response

Managed Threat Response.

Cyber threats are accelerating, are you ready?

Today's security landscape is complex, dynamic, and constantly evolving. Cyber attackers are using more advanced, varied, and relentless methods, while security teams are dealing with operational issues, such as lack of skills, too many alerts, multiple vendors, and regulatory obligations. AI is enabling attackers to reach you quicker than ever. Boost your cyber protection to the Xtreme!

Sentinel's Fortis**X**™ safeguards your business, facilitates digital transformation, fosters innovation, and promotes growth.

Fortis**X**™, powered by Cisco XDR, is a security solution that delivers best-in-class cyber protection: the top extended detection and response (XDR) platform from Cisco, broad third-party security solution integration from industry leaders, aligned with MITRE ATT&CK framework, with 24x7x365 security operations center (SOC) service from Fortis by Sentinel.

Fortis**X**™ is more than a service. It is a partnership based on four pillars: dependable technology, skilled and qualified people, proven methods, and utmost fidelity. With Fortis**X**™ your cyber security maturity will improve over time, using our cyber security workshops and giving you your FortisScore™, constantly assess your security environment, skills and capability to resist and react to the latest cyber risks.

With Fortis**X**™, you will benefit from:

Xtreme Intelligence: AI-powered threat detection and mitigation using sophisticated analytics, automation, and orchestration across all environments—email, edge, endpoint, identity, cloud, IoT, and more.

Xtreme Vigilance: 24/7/365 SOC service with a dedicated team of security experts utilizing automation tools to monitor, analyze, investigate, and resolve threats.

Xtreme Skills: Access to over 450+ technical resources and 17,000+ individual skills, ensuring a ready bench of experts equipped to solve nearly any technical challenge or security issue.

Xtreme Speed: Rapid detection and response capabilities, informed by the latest research, to counteract attackers within minutes, safeguarding against the quickest and most damaging cyber-attacks.

> **"Research from CrowdStrike™ in 2024 indicates that cyber attackers are able to acquire valid credentials within 40 minutes, followed by the deployment of ransomware to compromised devices in under 6.5 minutes."**

Xtreme Compliance: Compliance-centric SOC services, meeting the highest U.S. standards (CJIS, DoD, etc.), and offering customized sovereign SOC services for unmatched organizational protection.

Xtreme Recovery: With Fortis by Sentinel's ActiveRecovery™ services, be assured of rapid incident response and recovery, complemented by optional proactive Incident Response (IR) service contracts for enhanced readiness.

Comprehensive Cyber Security Solution: Enhanced optional services including managed services, NOC, consulting, CISO services, advanced technology assessment, compliance, incident response and recovery, proactive and reactive forensics, and continuous threat exposure management.

Fortis ActiveDefense™ SIEM: Advanced log searching, alarming, and IT system integration capabilities for comprehensive compliance, long-term log storage, search, and executive reporting.

Secure Hybrid Environments: Tailored protection for hybrid, multi-vendor, multi-vector environments using AI-powered detection and response to combat AI-powered threats.

Partnership and Growth: A partnership approach based on dependable technology, skilled personnel, proven methods, and commitment, aimed at enhancing cyber security maturity, innovation, and business growth.

Fortis**X**™ is the most complete threat detection service that can help you protect your hybrid, multi-vendor, multi-vector environment. Use the power of AI with Fortis**X**™ threat detection and response to fight against AI powered threat actors at your border. The new age of defense has begun!

FortisX™ powered by Cisco XDR

Secure your network while ensuring simplicity, visibility, and efficiency

Use cases

Intelligence: AI-powered threat detection and mitigation using sophisticated analytics, automation, and orchestration across all environments—email, edge, endpoint, identity, cloud, IoT, and more.

Speed: Rapid detection and response capabilities, informed by the latest research, to counteract attackers within minutes, safeguarding against the quickest and most damaging cyber-attacks.

Vigilance: 24/7/365 SOC service with a dedicated team of security experts utilizing automation tools to monitor, analyze, investigate, and resolve threats.

Compliance: SOC services that meet stringent U.S. standards like CJIS and DoD, along with customized sovereign SOC services, ensuring your organization aligns with the highest compliance requirements for maximum protection.

Partnership: An approach that focuses on reliable technology, skilled personnel, proven methods, and commitment. This approach is designed to enhance your cybersecurity maturity, foster innovation, and support your business's growth and development.

FortisX™ powered by Cisco XDR

FortisX™, powered by Cisco XDR, is a security solution that delivers best-in-class cyber protection: the top extended detection and response (XDR) platform from Cisco, broad third-party security solution integration from industry leaders, aligned with MITRE ATT&CK framework, with 24x7x365 security operations center (SOC) service from Fortis by Sentinel.

Common challenges

- **Complexity:** Increased number of complex threats that deploy tactics across multiple control points
- **Basic Integrations:** Existing solutions lack robust integrations.
- **Siloed Security:** Difficulty aggregating and correlating data from various security tools. Existing tools also lack the ability to apply analytics and effectively prioritize detections.
- **Choppy Response:** Making clear decisions and responding in an automated and consistent manner across environments is difficult
- **Spread Thin:** Other duties do not allow security the attention it requires.

Business outcomes of FortisX™ powered by Cisco XDR

- **Faster Detection:** Shorten the time between detection to response to minimize costly downtime.
- **Prioritization:** Prioritize eliminating the threats that pose the biggest risk to your company's bottom line.
- **Resource Efficiency:** Close skills gaps and scale security without hiring additional full-time employees.
- **Lateral Movement Detection:** Save on hardware costs while still using advanced network detection capabilities.
- **24/7 Expertise:** Expert "eyes on glass" 24 hours a day

Why FortisX™ powered by Cisco XDR?

FortisX™ powered by Cisco XDR, the ultimate security solution that combines the best of both worlds: the industry-leading extended detection and response (XDR) platform from Cisco, and the 24x7x365 security operations center (SOC) service from Fortis. Fortis is more than just a service. It is a security partnership that is based on four pillars: proven technology, experienced and skilled people, vetted processes, and fanatical loyalty.
