

Advancing Your Protection

Identity Workshop

Leave passwords in the past with Sentinel's Identity Workshop. Modern authentication technologies easily remove the risk of passwords.

Workshop Overview

Focuses on digital identity topics, including:

- Passwordless
- Identity and access management
- Privacy engineering
- Rule based access control
- Privileged access
- Conditional access
- Self-service password reset
- Multi-factor authentication

"By 2022, gartner predicts 60 percent of large and global enterprises, and 90 percent of mid-sized enterprises, will implement passwordless methods in more than 50 percent of use cases."

Benefits to the Identity Workshop

- Improve security, leading to a reduction in phishing and passwords attacks.
- Enable convenience and improve user experience by allowing users to easily login and access data from anywhere.
- Managed at scale to allow for single sign-in, MFA management, and creation of access policies.

More Information

Please contact your Sentinel Account Manager to schedule your identity Workshop, today! If you do not have a Sentinel Account Manager, feel free to contact us and we will ensure that you have everything.
