

# Sentinel Backup & Recovery Health Report

Gain visibility into your Veeam B&R and VB365 environments with Sentinel's Backup & Recovery Health Report. This tailored assessment consolidates system configuration details into a concise, easy-to-digest format that highlights system health, performance, and opportunities for improvement. With expert analysis and actionable recommendations, your organization can strengthen resilience, optimize operations, and prepare for future growth.

## REPORT OVERVIEW

- **Custom Calculations & Analysis** – Identify areas for optimization across job sessions with min/max/average duration, data size, and resource utilization.
- **Performance Metrics** – Track success rate trends, change rates, and visualize job/task concurrency with a heat map.
- **Curated Summary & Expert Notes** – Receive tailored interpretation from a Sentinel Solutions Architect, including best-practice guidance, actionable recommendations, and links to relevant Veeam documentation.

### Sentinel Moderator Qualifications

A certified Solutions Architect with deep expertise in Veeam design, optimization, and implementation – delivering actionable insights and proven strategies for backup and recovery success.

## BENEFITS

- **Operational Resilience** – Strengthen backup reliability and recovery readiness.
- **Performance Visibility** – Uncover trends and bottlenecks impacting efficiency.
- **Optimization** – Streamline resource usage and ensure scalable operations.
- **Expert Guidance** – Gain recommendations aligned with industry best practices.
- **Future-Ready** – Prepare your backup environment for growth and evolving business needs.
