

**ALWAYS LEADING**

Are you ready for the Microsoft AI workplace?

Microsoft 365 Copilot is poised to provide some of the most significant productivity gains we've ever seen in the workplace. However, getting the most out of these technologies will require proper planning & strategy.

Join us for a focused workshop on **Microsoft AI Readiness**

- Ideal for organizations already using M365 and are exploring M365 Copilot
- Provides an overview on the Microsoft Copilot portfolio of products and services
- Understand what M365 Copilot is and how it will work in your environment
- Review technical readiness requirements including security, privacy, & compliance
- Includes a short questionnaire to measure current M365 Copilot readiness areas:
 - Use Cases & Education
 - Governance
 - Information Landscape
 - Adoption
- Identify readiness gaps and opportunities for remediation
- Duration: 1.5hr
