

SmartTestAlx

AI-Powered Test Intelligence

SmartTestAlx scans website and generates production-ready automated test cases using advanced LLM technology

SmartTestAlx runs securely on your infrastructure — giving you full control over your data, compliance, and AI model usage

Why SmartTestAlx?

AI-Driven Test Generation

Create precise, maintainable test cases without exposing your code

Automation Intelligence

GenAI to reduce manual effort and increase coverage with self-healing

Security & Compliance

Keep your sensitive data within your environment — no data exposure

Seamless CI/CD Integration

Fit easily into your DevOps workflows for continuous testing

Benefits

Faster Release Cycles

Automate test case generation to speed up QA and deployment

Cost Efficiency

Reduce manual testing effort and costly failures in production

Improved Test Coverage

AI discovers edge cases and complex user flows that manual tests often miss

Data Privacy

Full control over your data and AI usage inside your infrastructure
