# sequoiaCombine

Accelerate Azure Delivery with Combine

Combine provides a focused and portable approach for Azure Government and SECRET DevOps, testing and accreditation

Microsoft Azure Emulator for Public Sector & "Air-gapped" Cloud Regions

sequoia Combine

Sequoia Combine provides a standardized approach for qualifications tasks such as operational testing, security assessment and continuous support.

Combine is an infrastructure automation tool that is used to provision, develop, and maintain Azure resources bound for public sector (Government) and "air-gapped" operational Azure Regions (SECRET).

Using Combine, Sequoia software developers, DevOps and infrastructure engineers programmatically create, control and update Azure Government and SECRET environments, using proprietary infrastructure-as-code (IaC) techniques to provide advancement in velocity, precision and repeatability.

Streamlines Government, SECRET & Azure IC/DOD Marketplace Transition & Accreditation

VELOCITY
Combine enables **iterative design and development for quick deployment** without the need for cleared personnel or time consuming resources on a cleared network

PRECISION
Combine provides a **standardized approach** for qualification tasks such as operational testing, security assessment and continuous support

REPEATABILITY
Combine is **updated by Sequoia's Azure experts** with on-site / hands- on Government/SECRET/TS knowledge

Combine Delivers Trust & Interoperability

Drives massive cost savings by deploying infrastructure-as-code (IaC) techniques with direct access to customer organizations

Provides **consistent risk assessment, mitigation techniques** and design recommendations to meet specific security compliance and risk management requirements e.g. **ICD 503**

Blending proprietary tech and unique customer authentication specifications and **operates with the sponsoring agency's authorization**

Online Combine Demo Available Soon

| De facto partnership between participating entities | Accelerates time to market | Provides a standardized approach | Improves demographic coverage | Provides access to IC Cleared Professionals | Empowers organizations |
