## Accelerating Classified Workload Adoption, Accreditation & Delivery

Migrating cloud environments…

… across the public sector, security-intensive, "air gapped" government cloud regions

Migration Challenges

- Significant technical and security differences between commercial and government "air gapped" regions

- Unique agency specific cloud provisioning environments

- Regulatory and security compliance per agency (RMF, agency-specific rules, etc.)

Support Challenges

- Lack of skilled, "cleared" personnel with limited experience and training in cloud skill areas

- Evolving cloud region baseline

- Limited or no access to target environments for commercial software providers

- High barrier to entry with TS/SCI cleared personnel

What is
Sequoia Combine™ ?

- Combine accelerates software workflows that generate efficiency, responsiveness and productivity for commercial vendors and government agencies

- USG approved, patent-pending cloud orchestration platform that provides an emulation of Azure Government and Azure SECRET clouds

- "Low to High" platform that simplifies the complexity of developing, testing and supporting IC and DOD classified applications to help drive USG focused digital transformation with unparalleled access and customer support

Combine for Azure

- Exclusive emulation platform for public sector and DOD cloud regions (Government & SECRET regions)

- Operates with the full trust, confidence and authorization from Microsoft and USG, supporting the DOD's & public sector's critical application workloads and Fortune 500 customers

  - Created and supported by IC cleared personnel with years of Microsoft Azure experience across public sector
  - Coming Soon: Microsoft Azure TS region support

Why Sequoia Combine™?

- Combine delivers efficiency, responsiveness and productivity through:
  - Acceleration of migration time and accreditation
  - Navigation of technology and air gapped region differences
  - Security and risk assessments
  - Increasing customer experience and support w/ target cloud expertise
  - Facilitation of "low-to-high" development and deployment
  - Direct engagement with USG customers without third parties
  - Utilize higher skilled non cleared workforce

Past Performance & Competency

- Sequoia has established itself as a leader in assisting the national security sector with strategy, architecture, migration and development solutions in the AWS cloud

- AWS Support Experience includes the US IC (C2S / SC2S) and DOD

- AWS/C2S past performance examples:
  - Application Migration/Optimization Support
  - New Application Development
  - System Architecture Design and Rollout
  - Managed Services (DevOps)
  - C2S / SC2S Security Support
  - Combine SaaS Commercial Products

- **Advanced AWS Consulting & Reseller Public Sector Partner**

- **Microsoft Partner Network Member, pending Gold status**

Next Steps

- **https://combine.io/**

- **License Format**
  - Month to Month
  - Annual

- **Pricing Model**
  - License User
  - Program
  - Enterprise

- **Optional Support**
  - Professional Services – TS/SCI w/ Polygraph
