Security

The Journey to a Modern Enterprise

Proven in delivering end-to-end cloud transformation.

Based on years of experience in helping customers move to Azure at scale. Everything that we do in the process of taking our customers to Azure is underpinned by the prescriptive guidance and processes included in the Microsoft Cloud Adoption Framework.

Servent

What is Azure Advanced Security?

The **Azure Advanced Networking** consulting service from Servent allows you to leverage the available networking services in Azure, supported by Servent.

Leveraging our **Azure Advanced Networking** consulting service, we will help you explore the myriad of available networking services available on the Azure platform and ultimately help you choose either single solutions or a combination of solutions to meet your own hybrid and cloud networking requirements.

Servent

Our Approach

Servent's Azure Advanced Networking Consulting Service simplifies the complexities of cloud and hybrid networking by focusing on four key areas, designed to align with your organisation's unique needs. Our approach is hands-on and collaborative, as we work closely with your Networking teams to assess, design, and implement networking solutions that are both technically sound and strategically aligned with your business objectives.

Connectivity
Connect Azure resources and on-prem resources using a selection of: VNets, Virtual WAN, ExpressRoute, VPN gateways, Azure DNS, Peering, and Azure Bastion.

Application Protection
Monitor all network resources in Azure using services such as Network Watcher or ExpressRoute Monitor.

Network Monitoring
Applications will be at the core of your business, and availability can be protected using Load Balancers, DDoS protection, Firewalls, Network Security Groups & VNet Endpoints.

Application Delivery
Solutions for application delivery: Content Delivery Network, Azure Front Door Service, Traffic Manager, Application Gateway & Load Balancers.

Servent

Why **Servent**

An agile partner who can mobilise in days and not months, with the skills and experience to deliver digital transformation for all businesses.

100% Azure Focused

As a leading UK Microsoft Partner and early adopter of Azure, we cover the full breadth of Azure services in depth, due to our 100% laser focus on the Azure platform.

15 Years' Experience

We've been with Azure since the beginning, with 15 years' experience we offer unparalleled expertise and help some of the biggest enterprises in their adoption of the Azure platform.

Enterprise Scale

Our extensive experience with some of the largest enterprise customers enables us to bring enterprise scale thinking to businesses of any size through our Enterprise Cloud approach.

Demystifying the cloud

We work with customers of all shapes and sizes across many industry verticals and help them better understand the Azure platform and how it can transform their Business

Servent

Benefits

Azure security capabilities offer a range of features and services that provide comprehensive protection for an organization's data and infrastructure, both in the cloud and on-premises. Some of these benefits include Centralised management, scalability, integration with on-premises security tools, advanced threat protection, compliance and regulatory support and automated responses all of which we will help you deliver.

Centralised Management

Comprehensive protection

Advanced threat protection

Compliance & regulatory support

Servent

Assess

Building a multi layered, secure foundation

We will analyse and review your organisations current security capabilities and posture. We will evaluate your license coverage or gaps and provide cost analysis of replacing existing security tooling with Azure native security services. Lastly, we will develop a roadmap to deliver solutions in line with your security aspirations and risk appetite.

Servent

Enable

Deploy and configure security with built-in security controls

We will look to immediately maximise your current ROI by quickly deploying and configuring any Azure security capabilities for which you are licensed but have not yet enabled. We would then work with your teams to deploy and configure in a cost-effective manner the Defender services relevant to meet your security requirements, ensuring that all agents/extensions, data connectors and supporting resources are fully operational and capable of detecting threats early with actionable insights.

Servent

Protect

Detect threats early with actionable insights

We help you secure your environment by remediating in a measurable way using Microsoft's secure score framework. We will improve your secure score by assessing and implementing system generated recommendations. We will help you evaluate; risk assess and remediate alerts and incidents generated by the Defender products and work with you to identify opportunities to investigate and respond to alerts and incidents rapidly with built-in orchestration and automation of common tasks.
