The Journey to a Modern Enterprise

Proven in delivering end-to-end cloud transformation.

Based on years of experience in helping customers move to Azure at scale. Everything that we do in the process of taking our customers to Azure is underpinned by the prescriptive guidance and processes included in the Microsoft Cloud Adoption Framework.

What is Azure Arc?

Azure Arc is a transformative solution that extends Azure's management capabilities beyond the Azure cloud, enabling unified governance and operational consistency across your entire IT estate—whether on-premises, across multiple clouds, or at the edge. It simplifies the management of complex environments and integrates both DevOps and ITOps practices, ensuring you have a consistent and secure management experience wherever your resources are located.

Our Approach

Our approach to implementing Azure Arc is methodical and customer-focused, ensuring that your organisation achieves the full benefits of this powerful platform. We begin with a thorough assessment and planning phase, working closely with your team to establish a clear roadmap. Next, we deploy and configure Azure Arc, automating processes for efficiency and providing hands-on training. Finally, we offer continuous support and optimisation, ensuring the deployment is successful and aligned with your business objectives.

Why **Servent**

Partner with a team that has a deep understanding of Azure and a proven track record in cloud transformations. Our 100% focus on Azure, combined with our status as a priority partner, allows us to deliver tailored solutions with agility and precision. We bring enterprise-scale expertise to businesses of all sizes, helping you navigate the complexities of modern IT environments with confidence.

100% Azure Focused

As a leading UK Microsoft Partner and early adopter of Azure, we cover the full breadth of Azure services in depth, due to our 100% laser focus on the Azure platform.

15 Years' Experience

We've been with Azure since the beginning, with 15 years' experience we offer unparalleled expertise and help some of the biggest enterprises in their adoption of the Azure platform.

Enterprise Scale

Our extensive experience with some of the largest enterprise customers enables us to bring enterprise scale thinking to businesses of any size through our Enterprise Cloud approach.

Demystifying the cloud

We work with customers of all shapes and sizes across many industry verticals and help them better understand the Azure platform and how it can transform their Business

Benefits

With Azure Arc your organisation can achieve unparalleled control and visibility across hybrid and multi-cloud environments. The platform enhances security by extending Azure's robust security tools across all your resources, while operational efficiency is improved through streamlined management and integrated DevOps practices. Additionally, Azure Arc enables cost optimisation and scalability, allowing your organisation to grow and adapt with ease.

 Unified Management

 Enhanced Security

 Operational Efficiency

 Cost Optimisation

 Scalability

Key Areas of Azure Arc Implementation

- 1. Management at Scale**
Project non-Azure and on-premises resources into Azure Resource Manager.
- 2. Diverse Scope**
Manage VMs, Kubernetes clusters, and databases as if they were running in Azure.
- 3. Familiarity**
Utilise familiar Azure services and management tools across all environments.
- 4. New Practices**
Introduce DevOps practices alongside existing ITOps.
- 5. Custom Configuration**
Create custom locations atop Azure Arc-enabled Kubernetes clusters.
