# What is Virtual WAN Assessment ?

The Azure Virtual WAN Assessment from Servent is our Azure networking assessment service that brings together core networking, security, and routing services in Azure.

We will make recommendations based on the assessment that we will undertake. Following the assessment, we will remain available for further engagement to help and assist with the implementation of the Azure Virtual WAN service.

# Azure Virtual WAN Assessment

Our Azure Virtual WAN Assessment is a three-day offering where we will work with your organisation to understand how we can deploy this service to provide you with an optimized networking experience in Azure. The Azure Virtual WAN Assessment from Servent will provide your organisation with the opportunity to engage with our Azure Architects and Engineers on all aspects of Azure Virtual WAN networking.

As the Azure public cloud has grown so have the numerous networking options and solutions available on the platform. Between the networking services native to the platform and the hundreds of others published in the Azure Marketplace the sheer scale of available and potential solutions can be somewhat overwhelming.

# Why Servent

We have a deep understanding of both native Azure and third-party networking offerings available in the Azure Marketplace. As part of our Azure Virtual WAN Assessment, we work with you to understand your business. We will identify hybrid and cloud networking solutions and services to provide you with the best and most appropriate Azure Virtual WAN solution for your organisation.

## 100% Azure Focused

As a leading UK Microsoft Partner and early adopter of Azure, we cover the full breadth of Azure services in depth, due to our 100% laser focus on the Azure platform.

## 15 Years' Experience

We've been with Azure since the beginning, with 15 years' experience we offer unparalleled expertise and help some of the biggest enterprises in their adoption of the Azure platform.

## Enterprise Scale

Our extensive experience with some of the largest enterprise customers enables us to bring enterprise scale thinking to businesses of any size through our Enterprise Cloud approach.

## Demystifying the cloud

We work with customers of all shapes and sizes across many industry verticals and help them better understand the Azure platform and how it can transform their Business

# Outcomes

Unlock the full potential of your organisation's network infrastructure with our comprehensive Azure Virtual WAN Assessment. By evaluating your WAN options, architecture, resources, connectivity, routing, and security, we provide tailored recommendations to optimise your network for efficiency, scalability, and security. Our assessment ensures your Azure Virtual WAN deployment is aligned with best practices, delivering a secure, seamless, and robust networking experience.

-  Azure Virtual WAN Options

-  Architecture

-  Virtual WAN Resources

-  Connectivity

-  Routing

-  Security

# Benefits

- Your assessment shall be completed by our certified Architects and Azure Engineers.
- Determine the most appropriate Azure Virtual WAN architecture for your organisation and how to migrate to Azure Virtual WAN.
- Ensure that Azure Virtual WAN is deployed following both Servent and Microsoft recommended best practice.
- We can help accelerate your Azure networking capability by leveraging our expertise for all aspects of Azure Virtual WAN and Azure networking in general.
- Enable your internal Network teams to deploy and manage new Azure networking solutions such as Azure Virtual WAN with confidence.
