Azure Data Foundation

Turnkey data platform

Building your data platform from the ground up can be a difficult and time-consuming process, not to mention resource-intensive. Servan believes that enterprise-grade data governance, automation and self-service are key differentiators for any business, and we can help you achieve this at a fraction of the time and cost of building it yourself.

Servian's Azure Data Foundations is a turnkey solution enabling companies to realise the value of cloud through an end-to-end automated data solution purpose-built for Azure.

What is it

Azure Data Foundation provides a tried and tested approach to data ingestion, transformation, and consumption on Azure.

Utilising best-of-breed Azure services, with a high emphasis on serverless capabilities, introduces customers to a cloud-native, extensible data platform which scales with your business and efficiently drives down TCO.

What are the benefits

For IT teams, the platform operationalises data management and eliminates data silos for central management of all enterprise data sources, regardless of location.

For business users, the platform delivers a self-service, enterprise-wide data catalogue through which to discover and wrangle data sets, and derive transformational business insights using advanced analytics.

What we deliver

You will receive an extensible unified data platform consisting of best-of-breed Azure services that together provide a capability for a Data Lake, Data Pipelines, Data Warehouse, Semantic Data Model, Data Visualisation, Metadata and Audit frameworks.

All delivered via a deployable Infrastructure-as-Code using Terraform and Azure DevOps.

Key Features of the Data Foundation

Data Lake	Data Pipelines	Data Warehouse	Semantic Data Model	Data Visualisation	Metadata Framework	Audit Framework	Automated Deployment

Why Servian

We drive a competitive advantage for our customers by enabling them to become truly data-driven. We help organisations design and implement robust enterprise data management strategies and data platforms that ensure the security, accuracy, and reliability of their data. Our services in data and analytics span across advisory, consulting and managed services.
