TURBOCHARGE YOUR USE OF POWERAPPS & FLOW

NO CODE OR EXPERIENCE REQUIRED!

Build solutions that specifically target your company's unique business needs with little or no code required! This 2-Day hackathon will teach you to build apps without enlisting the expertise of costly, professionally trained software developers.

PowerApps and Flow are new Microsoft offerings enabling business users to build solutions to improve productivity. Examples include inspections, electronic forms, cost estimating, budget tracking and loads more! No developer or advanced programming knowledge is needed. Paul Culmsee will guide you through basic to complex scenarios and you will come away with the knowledge and confidence to improve efficiency and productivity, freeing up valuable time so you can focus on the more strategic issues.

WHO SHOULD ATTEND

This course is for any users seeking to innovate or simply automate manual processes. Basic Excel knowledge is definitely an advantage.

YOUR INSTRUCTOR

Paul Culmsee
SEVEN SIGMA

AIMS & OUTCOMES

- Understand how to get the best out of PowerApps, Flow, SharePoint and other systems
- Quickly build custom apps that run on mobile devices
- Connect with a variety of data sources
- Learn tips and tricks that you do not find in the documentation
- Automate processes via building flows
- Share apps inside your organisation securely

Paul, awarded the Microsoft Business Solutions MVP for his contributions in the PowerApps and Flow platforms, is a certified trainer who has run sold-out PowerApps and Flow hackathon-style training around Australia, New Zealand, and Singapore. He is also a management consultant, and author of two award winning books. "The Heretic's Guide to Best Practices: The reality of managing complex problems in organisations", and "The Heretic's Guide to Management: The art of harnessing ambiguity."
