Azure Red Hat OpenShift: 1-Day Workshop

$1,000 / 1-Day

Gain hands-on experience with Red Hat OpenShift by deploying and securing a container-based application on top of Azure Red Hat OpenShift.

As a Microsoft Gold Partner and a Red Hat Apex Partner, Shadow-Soft's certified engineers can architect, implement, and customize an Azure Red Hat OpenShift solution to meet unique requirements. Learn how to rapidly build and configure a Red Hat OpenShift cluster, and integrate it directly with Azure Services, allowing your organization to enable developer speed and increase efficiency.

What's Included:

- Learn how to provision and configure a OpenShift cluster with cluster sizing, capacity/ network planning, storage, cluster monitoring

- Learn how to manage platform operations, including cluster security and governance, backup, performance, logging, metrics, and capacity

- Learn more how to integrate CI/CD pipelines using Azure DevOps with repository management and artifacts

- Learn how to integrate and make use of Azure Services

Key Benefits

- Azure and Red Hat Certified Engineers

- PoC funding programs available

- Enablement and training
