

# Azure AD Single Sign on

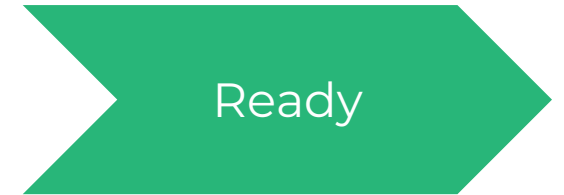

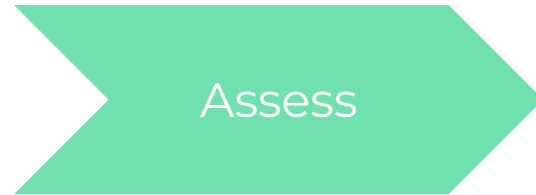

---

Shaping Cloud

# Approach

# Getting started

## 1 Kick Off

Customer & supplier stakeholders review & agree the project initiation document; defining ways of working, collaborative workspaces and project artefacts

## 2 Envision

We plan your MVP scope and capture in a high level design /solution design document.

## 3 Design

Our solution design document includes agreed architectural principals & constraints; with conceptual and solution architecture included

# Azure AD Single Sign On

I want to introduce Azure AD Single Sign On

- Discover the internal requirements
- Solution design
- B2C tenant demo & test policies
- Agreed approach and strategy to build, deploy & release

- ✓ Improved user experience through SSO
- ✓ Access policies with identity protection & conditional access
- ✓ Improved security

# Azure AD is part of Microsoft Entra

## Azure AD B2C & B2B

*Protect your users, apps, workloads and devices*

- Protect resources
- Seamless, familiar UX
- Unified Id management
- Simple governance

## Permissions Mgmt.

*Complete visibility and control for your identities and resources*

- Full visibility
- Least privilege
- Unified access

## Verified Id

*Start your decentralized identity journey*

- Innovate JML
- Streamline self-service

*“This is an innovative product for the region, with limitless potential. It has been a pleasure to work with Shaping Cloud... they are a great partner to GMHSCP and GMCA teams”*

## Technologies

- AAD B2C
- AAD B2B
- SQL PAAS
- App Services

## Situation

Greater Manchester Combined Authority (GMCA) needed an identity and access management solution to deliver staff, partner and citizen single sign-on to digital services, in context of the regional digital architecture.

## Solution

Shaping Cloud landed Microsoft AAD B2B and B2C for the Authority, aligning fully with GMCA Digital Blueprint, and integrating seamlessly with existing architecture.

## Impact

Greater Manchester citizens and staff can access a wide range of digital services with a single, trusted digital identity - with more services being added as the solution gets rolled out.

# Shaping Cloud

## Cloud first

We are a true cloud-first focussed Microsoft Gold Partner

## Extensive experience

We have strong, referenceable case studies across NHS, enterprise, Gov, and local and regional

## Realistic advice

We provide realistic and pragmatic advice based on real-world operational experience

## Technical knowledge

A breadth and depth in technical knowledge across the delivery team

## Early Azure adoption

Shaping Cloud was one of the first adopters of Azure – we've walked the walk since day one

## Proven track record

A proven track record delivering digital transformation
