

Azure Assessment

Shaping Cloud

Getting started

1 **Planned**

We assess your existing IT real-estate, deliver a migration strategy and pragmatic plan, highlighting dependencies and key risks.

2 **Designed**

We deliver a solution design meeting your requirements for performance, management, governance, security and DevOps.

3 **Ready**

We migrate and modernise your servers, applications, and data. We test and review with your teams to ensure we're ready to go

Assess and plan

I want to get started preparing to migrate and modernise

- Discover the existing IT real-estate
- Assess workloads in scope for migration
- Define a migration strategy
- Develop my target Azure architecture

- ✓ Reduce migration risk and uncertainty
- ✓ Fully prepare your business for migration

Scope

Data tier and
service
assessment

Server
assessment
