Azure Migrate & Modernise

Shaping Cloud

Getting started

| Discover | Assess | Deploy | Release |

1 Migrate

We securely migrate and modernise your servers, applications and data, in accordance with your migration assessment plan

2 Validate

We validate the migration has been successful, complete post migration and modernisation configuration, and test functionality
3 Ready

Our collaborative approach means a smooth transition of migrated and transformed services to the operations team, ready for use

Migrate and modernise

I want to migrate and modernise, and have completed assessment and planning work

- Migrate and modernise workloads
- Test and validate
- Transition to Ops / BAU

✓ Adopt Microsoft best-practice

✓ Deliver migration work efficiently

Scope

Workload plan	Pre-requisites	Asset replication	Asset remediation	Pre-failover tasks, go / no-go	Failover and migrate

Configuration changes	Communication tests	Business testing	Operating procedures	Transition into operations	Release sign-off

Shaping Cloud

Cloud first
We are a true cloud-first focussed Microsoft Gold Partner

Extensive experience
We have strong, referenceable case studies across NHS, enterprise, Gov, and local and regional

Realistic advice
We provide realistic and pragmatic advice based on real-world operational experience

Technical knowledge
A breadth and depth in technical knowledge across the delivery team

Early Azure adoption
Shaping Cloud was one of the first adopters of Azure – we've walked the walk since day one

Proven track record
A proven track record delivering digital transformation
