

Shaping Cloud's Azure Rapid Migration Assessment

Azure Marketplace

Summary

Purpose & Benefits

Through our Azure Rapid Migration Assessment, we'll accelerate and de-risk your journey to the cloud.

Sustained Success

Our assessments go beyond planning – they're about strategic execution. We offer a holistic approach that considers not only the migration itself but also the ongoing optimisation required for sustained success.

Cost & Risk Management

Minimising the costs and risks associated with cloud adoption is at the core of our approach. Our focus is on providing you with a clear path to the cloud that maximises the value of your investment while keeping any potential risks in check.

Faster Benefit Realisation

Realising the value of the cloud should not be a prolonged process. We understand that time is of the essence, and our approach is geared towards helping you unlock the full potential of the cloud faster.

As a Microsoft AMM Partner with Infra + DB Specialisation, subject to your eligibility, we'll negotiate and secure funding on your behalf – reducing your costs.

Our method is grounded in more than ten years of hands-on delivery experience.

PHASE 1

Initiate

1. We'll start by getting to know your technical and non-technical stakeholders; exploring their foundational pain points and requirements.
2. We'll then unearth and quantify your goals, which we'll frame in the context of your short, medium, and long-term strategic objectives, opportunities, and challenges in combination with your policies and procedures and regulatory and statutory obligations.

PHASE 2

Discover

3. Next, we'll deploy Azure Migrate to examine the size, shape, and configuration of your existing infrastructure, applications and data. We'll also expose any core dependencies between your workloads.
4. We'll then prioritise and document your stakeholders' needs (in the context of any wider timeline and budgetary constraints or pressures).

PHASE 3

Report

5. Next, we'll bring together our tactical and strategic observations and recommendations – advising on the suitability, advantages, timeline, and costs of migrating your infrastructure, applications, and data to the cloud.
6. Finally, if the business case is clear, we'd be happy to pull together a much more detailed migration plan for you.

Deliverables:

- Directional Business Case
- High-Level TCO

Why Shaping Cloud?

Here's why we're different:

Access To Funding

As an Azure **AMM Partner** with **Two Specialisations** and **Five Solution Partner Designations**, we'll negotiate and secure funding from Microsoft on your behalf; reducing, if not eliminating entirely, your rapid migration assessment cost.

Access To Expertise

We employ more than **40 Azure Migration Consultants, Engineers, and Analysts**. They offer more than **150+ Years' Experience** and are backed by **100+ Microsoft and Industry Accreditations**. Moreover, we get advanced access to Microsoft's newest technology.

Access To Experience

Since 2010, we've migrated thousands of workloads for local and central government authorities and executive agencies, publicly funded health and social care organisations, and global professional services firms – an outstanding track record of success.

Outcomes-Focused

We prioritise enabling our clients to realise their short-, medium-, and long-term aims and desired outcomes – maximising the value of their strategic technology investments. As such, we prefer to work on an outcomes basis – boosting our accountability

Zero Bureaucracy

We're easy to engage and work with – we empower our people to make the right decisions for and with our clients' people; there's never ever bureaucracy to contend with.
