Azure Enterprise Landing Zone

Shaping Cloud

Getting started

| CAF Workshops | Design | Deploy | Review |
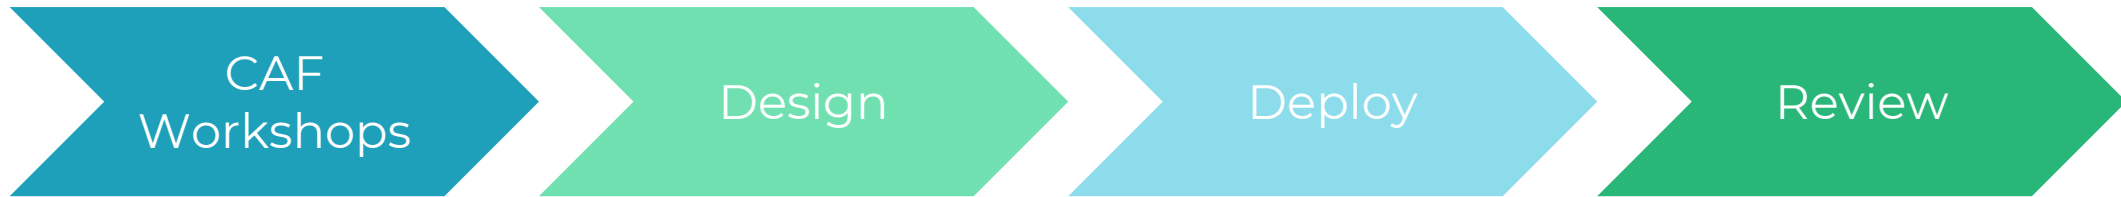

1 Compliant

We ensure the design fits your organisation's needs for management, governance security, and DevOps.

2 Environment

We plan your cost management, access management, network topology, and resource organisation.

3 Ready

We set up your Landing Zone, testing and review with business and technical stakeholders to ensure readiness.

Landing Zone

Enterprise Landing Zone

- Medium and enterprise businesses, public sector
- Larger, multi-subscription models
- Custom requirements
- Production ready for business-critical workloads

✓ Improve security, compliance and governance

✓ Get ready for migration to Azure

✓ Optimise existing Azure usage

✓ Adopt Microsoft best-practice

Conceptual architecture
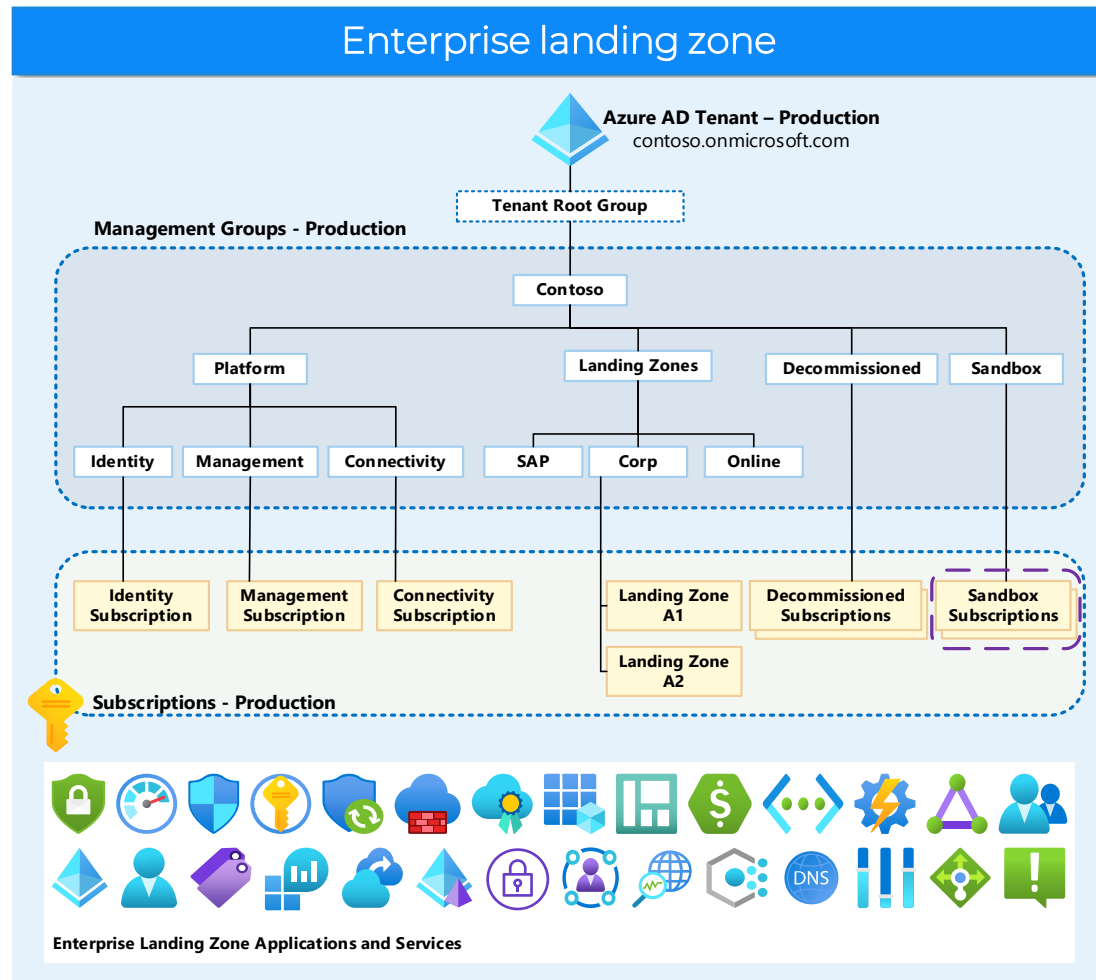

Service scope

Security Protect	Security Center	Monitor	Network Security Groups	Key Vaults	Extended Security Updates	Firewalls
