Azure Virtual Desktop Introductory Workshop

Azure Marketplace

—

Summary

Purpose & Benefits

Through our **Introductory Workshop**, you'll fully understand AVD's features, advantages, benefits, use cases, and pre-requisites.

Strategic Alignment

We'll help you to understand if AVD's the right choice for your organisation (in the context of your environment and short-, medium-, and long-term aims and objectives) – ensuring strategic alignment at every level.

Clear Business Case

We'll expose the business case – the use cases, costs, and risks – linked to deploying an AVD platform. As an experienced AVD partner, we'll also identify ways to reduce your costs and de-risk your programme.

Concise Next Steps

At the end of the workshop, we'll present a clear, high-level plan – including, where relevant, details to initiate a low-cost (if not free) proof of concept.

We deliver these workshops free of charge.

Approach

During our two-hour workshop, we'll cover the following topics:

Introduction
First, we'll help you to understand the basics of AVD – its features, benefits, and use cases, particularly for hybrid and remote workforces.

Demonstration
Next, using our live demonstration, we'll help you to explore AVD's deployment, management, customisation, and security features.

Cost Optimisation
Then, our AVD experts will guide you through how to optimise your AVD costs using Scaling Plans and Multi-Session Host Pools.

Considerations
We'll then discuss the best way to implement AVD in the context of your unique needs. We'll also share our lessons learned!

Programme Funding
Next, we'll describe what funding's available from Microsoft to reduce your costs and accelerate your delivery.

Summary
Finally, as well as answering any questions you might have, we'll share with you a clear set of next steps.

Our tried-and-tested methodology is grounded in more than ten years of hands-on delivery experience. Our people are, first and foremost, experienced practitioners – not theorists.
