# Shellsoft M365 MANAGED SERVICES THAT WORK FOR YOUR BUSINESS

## What is it all about?

### Customer Challenges

Today, Customers has its vision to become the most admired organization on its line of business by continuously innovating its products, and services using cloud cutting-edge technology. However, several challenges hindered the customer from achieving its vision. Many don't have the skills and the scale that can handle projects of different sizes and complexities while others do not have an implementation methodology that ensures a smooth transition to the cloud.

### Our Ideal Solution

The solution must allow the administrators to quantify the cloud benefits while implementing security and compliance policies with the ease of management allowing the administrators to be efficient in their work. This allows the customer to save time and money while strengthening security; From the users perspective, the solution must be simple, flexible and mobile.

### Desired Outcomes

Why our customers use Shellsoft M365 Managed Services?

- Reduce administrative cost
- Mitigate risks
- Ensure compliance
- Improve productivity
- Boost employee satisfaction

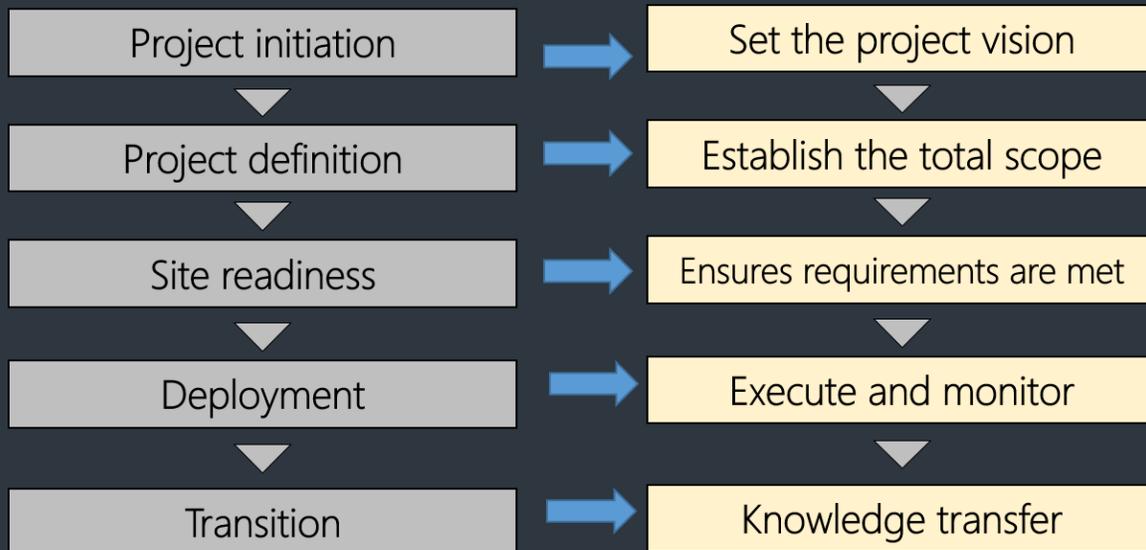

Customers want to move to the cloud, and they want an expert to help them do it.

## What we do?

### IMPLEMENTATION SERVICES

Our proven project management methodology ensures a smooth transition to the cloud.

### MANAGED SERVICES

Our team not only has the skills, but also the scale. We can handle projects of different sizes and complexities.

## Microsoft 365 and Shellsoft Technology Corporation: Delivering an end-to-end solution for your data and applications anytime, anywhere and on any device!

### Security

Increased control by implementing central policies. Microsoft 365 is a suite of solutions composed of Windows 10, Office 365, Enterprise Mobility Suite. Windows 10, the most secure windows operating system, gives provides intelligent security and simplified updates

### Mobility

With Microsoft 365, you have the freedom to choose your own device and access your work anytime anywhere, and on any device

### Central Management

Gain flexibility on provisioning workstations according to user needs. Upgrades and patches are done using a single administration Portal

### Reduce Cost

Harnessing the power of M365 offers the benefit of more effective use of centralized computing capacity. This can translate in real savings to a diminished need to purchase new hardware and support costs that are seen in OPEX dollars.
