

ShiftLink
Shift the way you work.

System Introduction

The problem we solve:

The time, cost and frustration of filling vacant shifts

Designed in partnership with users in the health care and social service sectors

- 1 Quickly and efficiently notifies staff of shift opportunities
- 2 Works with multi-site, multi-role, 24/7 operations
- 3 Equitable and transparent shift allocation that works with your existing process, maximizing your staff pool

ShiftLink
Shift the way you work.

The 3 sides of ShiftLink

Staff call-out system:

Quickly and efficiently notify staff of open shifts

Integrated scheduling platform:

Create and manage long-term schedules

Data warehouse:

Custom reports, business & artificial intelligence

A system profile is created for each frontline staff member based on:

**Profession
or Role**

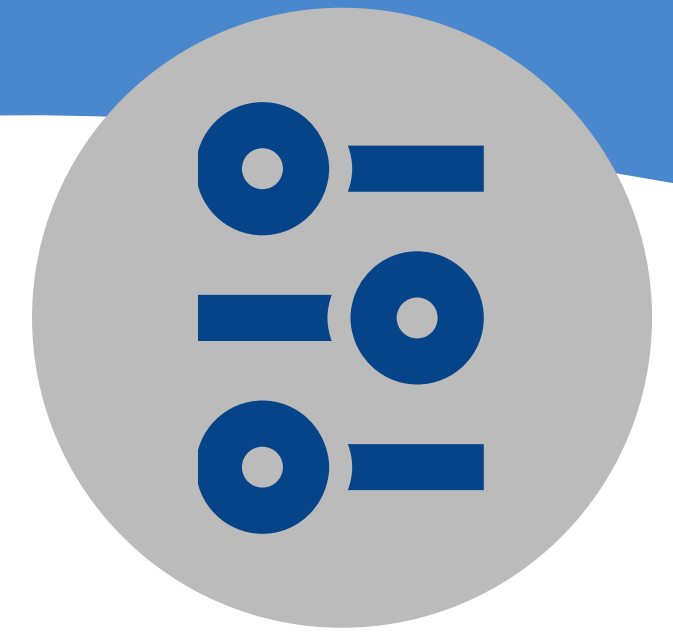

**Locations or
Programs**

**Employment
status**

**Seniority
or experience**

Preferences

How it works!

1

Manager posts a new shift in the system

2

Matching profiles receive notification, view details and respond: 'Accept' or 'Decline'

3

Manager is alerted to responses (in order of seniority if necessary) and makes a selection

Notifications through App, email and text

It's a simple process

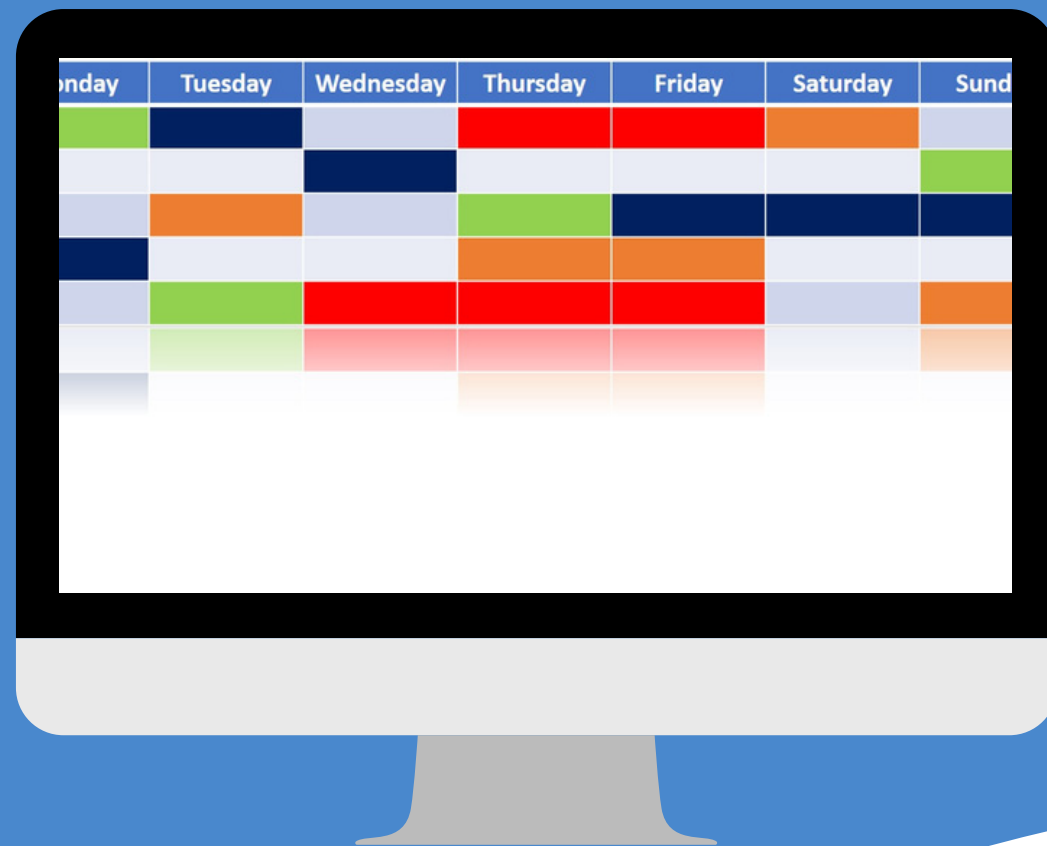

4

Staff are notified of shift status and can view upcoming shifts

5

Awarded shifts are automatically transferred to the schedule module

6

Managers can pull records of shifts, hours, locations and individuals

It's a simple process

Hospitals and social service organizations
