Unicode and Non-English Support	Preserves all characters and special symbols
Detailed Migration Reports	Get a summary and detailed log of migrated mailboxes
No Mailbox Size Limitations	Handles large mailbox data without throttling

[More Features](#)

How it Works

EdbMails IMAP Migration connects to the source IMAP server using login credentials and securely retrieves mailbox data including emails and folders. It then transfers the data directly to the target Office 365, Exchange, or another IMAP server while preserving the folder structure and metadata.

Steps to perform IMAP Migration using EdbMails

- Sign up or log in to EdbMails.
- Download and install the EdbMails IMAP Migration application.
- Launch the tool and select "IMAP Migration".
- Enter source IMAP server credentials.
- Connect to the target (Office 365/Exchange/IMAP).
- Map mailboxes and start migration.
- Monitor live progress and export reports.

Security and Compliance

Advanced encryption technologies and modern authentication methods

Security

- TLS encryption for email transmission
- OAuth 2.0 support for Office 365
- No data stored on intermediate servers
- GDPR, HIPAA, SOC 2 readiness

Secure IMAP migration to protect your data

EdbMails is certified for ISO 27001:2013, GDPR, and HIPAA compliance, adhering to the highest security standards and ensuring that your data remains fully protected throughout the migration process.

Licensing and Pricing

Cost-effective solution

EdbMails IMAP Migration is licensed per mailbox. Pricing is based on number of mailboxes to be migrated.

License is valid for lifetime

Unlimited migration support

Safe, secure and tamper-proof migration
