EdbMails for SharePoint migration made it **easy!**

Core Features

EdbMails is a robust and intuitive migration tool designed for IT administrators to move SharePoint data with zero downtime and no data loss. It is available as a desktop-based application, seamlessly connecting to SharePoint Online using modern authentication and Graph API.

Supported SharePoint Scenarios

- SharePoint Online to SharePoint Online (cross-tenant migration)
- SharePoint Online Site to Site migration (within the same tenant)
- SharePoint Online Subsite to Site or Site Collection
- SharePoint Online List and Library level migration
- SharePoint Online Folder and File level migration

Features

- Migrate SharePoint Online sites and subsites
- Transfer document libraries, lists, permissions, and metadata
- Maintain source and target sites hierarchy
- Incremental migration support.
- Secure OAuth 2.0 and Modern Authentication
- Real-time progress and detailed reports
- Supports migration between Microsoft 365 tenants

[More Features](#)

How it works?

EdbMails connects to the source SharePoint Online using secure OAuth 2.0 authentication and retrieves site content including document libraries, lists, folders, files, and metadata. It performs a direct migration to the target SharePoint Online sites, OneDrive for Business, Microsoft 365 Groups, and Teams without storing data on intermediate servers. The tool ensures that the original site structure, permissions, and metadata are preserved throughout the migration.

Steps to perform SharePoint Migration using EdbMails

- Sign up or log in to EdbMails.
- Download and install the EdbMails application
- Set the required permissions
- Connect to SharePoint Source server
- Select the required sites for migration
- Connect to target SharePoint servers (OneDrive, Teams, Groups & SharePoint)
- Map the sites between the source and the target
- Start migration and monitor the progress
- View migration summary and logs

Security and Compliance

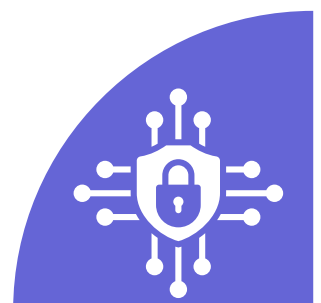

Security

- SSL and TLS encryption
- Support for Multi-Factor Authentication (MFA)
- OAuth 2.0 authentication for Office 365
- No data stored on intermediate servers
- Compliant with GDPR and HIPAA regulations

Secure SharePoint migration to protect your data

EdbMails is certified for ISO 27001:2013, GDPR, and HIPAA compliance, adhering to the highest security standards and ensuring that your data remains fully protected throughout the migration process.

Advanced encryption technologies and modern authentication methods

Licensing and Pricing

Cost-effective solution

The SharePoint site license is based on the number of source sites you want to migrate. To put it another way, if you want to migrate 200 sites from the source tenant to different target domains, you only need 200 SharePoint site licenses. In addition, you can use these licenses to migrate to the same target sites any number of times.

24/7 Technical, Live Chat Support (Free for a lifetime)

Unlimited file size with free Software Upgrades for a lifetime.

Use unused licenses anytime in future

Conclusion

EdbMails offers a secure and efficient solution for migrating SharePoint Online data across Microsoft 365 environments. The SharePoint Migration Tool supports a wide range of scenarios including tenant-to-tenant, site-to-site, and granular level migrations. It enables the transfer of document libraries, lists, folders, files, and metadata while preserving the original structure and permissions. With support for OneDrive, Microsoft 365 Groups, and Teams, and utilizing OAuth 2.0 authentication, EdbMails ensures a seamless and reliable migration experience without storing any data on intermediate servers.

Benefits of EdbMails software for SharePoint Migration

- EdbMails provides a user-friendly software interface to successfully migrate SharePoint sites data with minimum number of clicks
- No PowerShell scripts to achieve SharePoint migration
- Cost effective SharePoint migration
- Automatic mapping of SharePoint sites between the source and the target servers.
- Support for secure modern authentication to connect to source and the target servers.
- Free 24x7 tech support to address any queries related to migration.
