- MS Teams tenant to tenant migration
- Cross-Domain Teams Migration
- Staged Teams Migration
- Bulk Teams sites Migration

Features

- Advanced filter options
- Auto-mapping of source and target sites
- Maintain source and target sites folder hierarchy
- Incremental migration support.
- Scalable for large enterprise migrations

- Secure OAuth 2.0 and Modern Authentication
- Retry and re-migration for failed or missed items
- Support for shared files and permissions
- Retention of metadata (created/modified timestamps)

More Features

How it works?

EdbMails establishes a secure connection to the source Microsoft Teams environment using OAuth 2.0 authentication and intelligently extracts data such as teams, files, tabs, and settings. It directly transfers the content to the target Microsoft 365 tenant without using intermediate storage or staging areas. Throughout the process, EdbMails maintains the original team structure, membership, and associated metadata, ensuring a consistent and compliant migration.

Steps to perform Teams Migration using EdbMails

- Sign up or log in to EdbMails.
- Download and install the EdbMails application
- Set the required permissions
- Connect to source Teams sites
- Select the required sites for migration
- Connect to target Teams sites
- Map the sites between the source and the target
- Start migration and monitor the progress
- View migration summary and logs

Security and Compliance

Security

- SSL and TLS encryption

- Support for Multi-Factor Authentication (MFA)

- OAuth 2.0 authentication for Office 365

- No data stored on intermediate servers

- Compliant with GDPR and HIPAA regulations

Secure Microsoft Teams migration to protect your data

EdbMails is certified for ISO 27001:2013, GDPR, and HIPAA compliance, adhering to the highest security standards and ensuring that your data remains fully protected throughout the migration process.

Advanced encryption technologies and modern authentication methods

EdbMails

Licensing and Pricing

Cost-effective solution

The license is based on the number of source sites you want to migrate. To put it another way, if you want to migrate 200 sites from the source tenant to different target domains, you only need 200 site licenses. In addition, you can use these licenses to migrate to the same target sites any number of times.

BEST PRICE

24/7 Technical, Live Chat Support (Free for a lifetime)

Unlimited file size with free Software Upgrades for a lifetime.

Use unused licenses anytime in future

EdbMails

Conclusion

EdbMails delivers a dependable and streamlined approach to migrating Microsoft Teams data across Microsoft 365 tenants. Whether you're consolidating tenants, transitioning to a new environment, or restructuring Teams for better collaboration, EdbMails handles the complexity with secure authentication, smart automation, and precise data mapping. Designed for business continuity, it ensures a compliant, scalable, and disruption-free migration—making it a perfect fit for organizations aiming for efficiency without compromising data integrity.
