

Fabric Enablement

Implementation + Data Culture and Governance

The Fabric Enablement offering is designed to help you:

- Gain a comprehensive understanding of your data landscape
- Implement robust data governance with a tailored configuration of the Fabric platform
- Set up your organization for autonomous success by creating a self-sustaining ecosystem that empowers users to innovate responsibly within the established framework and policy
- Provide the necessary admin training to support short and long-term decisions within the practice

A comprehensive Fabric Enablement fosters the right data culture that ensures your organization can effectively manage, utilize, and optimize its data resources, leading to improved decision-making and business outcomes.

We will:

- Conduct a thorough assessment to identify the data culture, data sources, data quality, and data usage as well as the understanding of how data is integrated through humans and tech
- Create a robust governance framework, encompassing policies, defining roles and responsibilities standards, and best practices for Fabric deployment, and management
- Engineer Fabric for successful growth and cost optimization while providing training and support mechanisms to future proof and nurture the platform

Benefits

- Gain a holistic view of your data landscape
- Implement robust data governance and a tailored Fabric solution
- Achieve long-term cost savings, improved business outcomes, and full-scale adoption

Deliverables/Artifacts

- Data Governance plan and documentation
- Configured Fabric platform and workflows according to governance
- Environment report
- Power BI Training
- Data Literacy Assessment
- Center of Excellence Playbook
