

Rapid Server Migration Service

Using technology to drive **OUTCOMES**

We help customers transform their business!

TOP CLOUD CHALLENGES

every company faces

LACK OF ALIGNMENT

Aligning on a strategy, approach, and executable plan to quickly and securely adopt cloud technologies.

COMPLEXITY

Having the right people, process, and technology to effectively manage and operate an ever-growing cloud environment.

EXPENSIVENESS

Organizations often lack the expertise required to effectively leverage services and resources to achieve desired business outcomes at the lowest cost.

Security

Why do cloud leaks keep happening? Because no one has a clue how their instances are configured

McAfee study finds poor setups, even worse visibility

SHI One cloud management

Public cloud **SERVICE OFFERINGS**

MIGRATE

- Assessments
- Landing zones
- Lift-and-shift migration
- Data center evacuation

MODERNIZE

- Cloud architecture reviews
- Automation
- DevOps
- Refactor and re-platform

OPTIMIZE

- Identify cloud waste
- Remediate cloud waste to save 30-50%
- Improve cloud governance

MANAGE

- Named Technical Account Manager
- 24x7 support
- Monitoring, patching, backup management
- Incident and service request management

Migration

Helping you move to the cloud

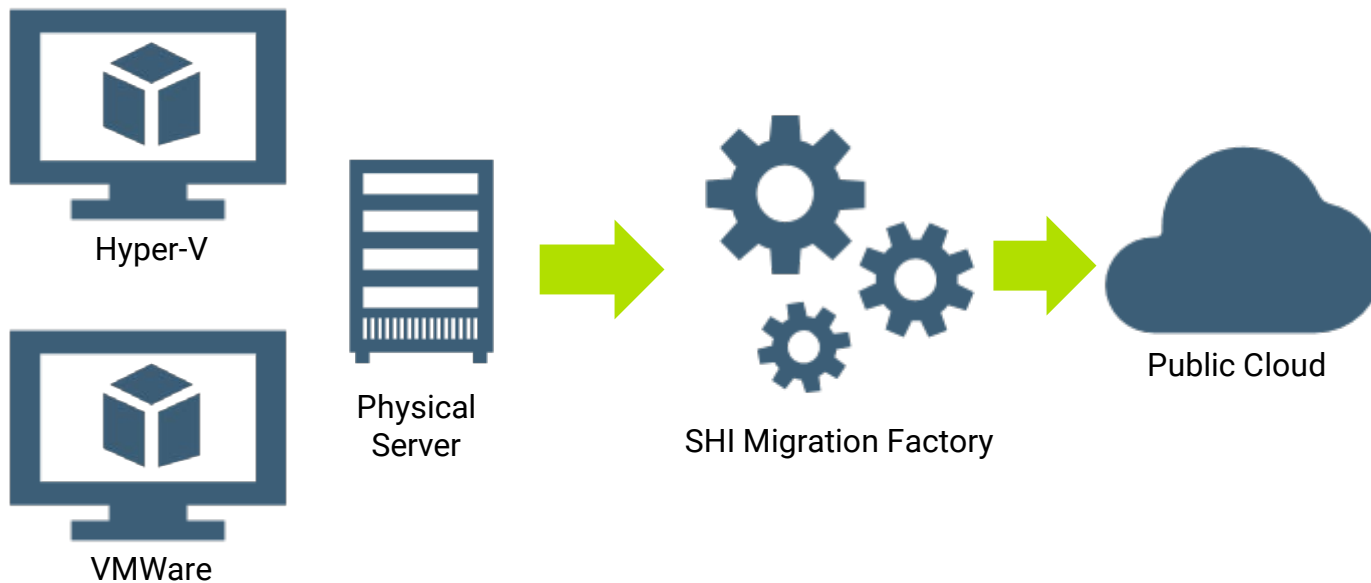

SHI offers a complete set of services and expertise to help you realize your single-cloud, multi-cloud, or hybrid-cloud strategy faster and more cost effectively.

	PLANNING AND ASSESSMENTS	Assessments (Economic and licensing)	Migration planning
	BEST PRACTICE DESIGN AND BUILD	Landing zones (Best practice foundational deployment)	Cloud adoption framework
	MIGRATIONS	Lift-and-shift migrations (Data center evacuation)	Custom application migrations (Refactor to cloud-native)

SHI's Rapid Server Migration Service

Efficiently and securely move to the cloud with confidence

For a simple lift and shift, the **Rapid Server Migration Service** is designed for customers who want to quickly and efficiently move to the cloud. It is a fixed fee service to migrate workloads of less than 100 servers.

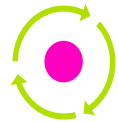

Service Benefits

1. Work completed by certified cloud architects
2. Leverage SHI's proven migration methodology
3. Free up your resources to complete other tasks
4. Ensure your migration follows best practices
5. Fixed pricing to remove uncertainty

Whether you need physical servers or virtual machines migrated, SHI has you covered!

How we do it?

Rapid Server Migration Methodology

ENVISION

GO LIVE

Planning

Planning best practices and recommendations

Assessment

SHI will perform a review of the existing systems and environment

Planning

We create a migration plan including specific requirements and cloud platform components

Deployment

Deployment guidance, security, compliance and communication

Cloud Deployment

Our architects build out your cloud infrastructure using best practices

Migration

Content inventory, modernizing, and migration services

Migration

Certified engineers migrate your systems to your new cloud environment

Testing

You'll be part of the process as you test your applications and report any inconsistencies

Optimization

Content inventory, modernizing, and migration services

Compute Optimization

As we finish, we adjust your instance sizes for efficiency and provide knowledge transfer.

Electrical Engineering Firm Migrates to Azure

CUSTOMER PROFILE:

Engineering firm with over 500 employees needed assistance with Cloud Cost Assessment and Migration deployment plan

CHALLENGE

Customer is an established nation-wide Electrical Engineering firm that has expanded to multiple locations. With this additional growth, the customer wanted to utilize cloud computing and approached SHI to assess and migrate their current environment to Azure.

SOLUTION

Customer was already leveraging Azure but needed additional servers migrated into their cloud environment. They lacked internal resource availability and expertise. Customer also needed an assessment of their complete environment, assistance with identifying any migration concerns and mitigation plan as well as understanding of long-term cost implications.

RESULTS

SHI leveraged an agent-less assessment tool to capture the full environment which provided instance mapping, migration service estimates, post-migration Azure service cost estimates with utilizing Hybrid and Reserved Instance pricing. SHI also performed the migration of the remaining services leveraging our Rapid Server Migration methodology.

To learn more about our **Rapid Server Migration Service** or how we can help your organization Modernize or Optimize. To get started, contact your SHI Account Executive today!
