How this Fintech Lending App mitigated security audit roadblock and partnered with a multinational bank

Security Challenges

❌ Needs to protect the complete tech-stack without constraining developers or getting contentious with IT

❌ Must meet RBI guidelines and PCI-DSS compliance requirements

❌ Wants to perform quick security assessments

❌ Eliminate the noise of too many alerts; and focus on critical issues that could lead to a security incident or data breach

Solution

✅ Performed full-stack security assessment without interrupting operational and production systems, and without installation of agents

✅ Able to meet compliance mandates and demonstrate controls to auditors

✅ Entire security assessment completed in 24 hours

✅ Context-based risk prioritization and remediation—all with zero impact on the production environment
