

# Smarter Loss Prevention for Self-Checkout

***ShopWatch gives you 20/20 vision at the checkout – precise, real-time detection of every unscanned item.***

## SCO Loss Prevention Is Here

ShopWatch is Shopic's advanced computer vision solution for self-checkout. Powered by proven item-level recognition, it detects and prevents shrink in real-time without disrupting the shopper journey. Every day without ShopWatch is money lost to undetected fraud and inefficiency. Safeguard your revenue with the best computer vision solution built for retail self-checkout.

## Key Differentiators

**Item-Level Recognition at Scale** Recognizes tens of thousands of SKUs— not just object movement or gestures.

### Edge-Based, Real-Time Processing

Runs fully on-device with no cloud dependency, ensuring sub-100ms detection.

### Near-Zero False Positives

AI adapts to store-specific assortment and behavior, keeping staff focused on helping shoppers.

### SCO Agnostic

Seamlessly integrates with SCO providers via lightweight APIs.

### Shopper-Centric Experience

Enables real-time shopper self-correction and improves checkout flow e.g. produce assist.

## Core Capabilities

- Detects mis-scans, barcode switching, items left in cart, post-payment and more
- Provides detailed shrink recovery reports
- Supports self-correction prompts at checkout
- Reduces intervention load on store associates

## Why ShopWatch

- Up to 3x more shrink recovery vs. standard LP systems
- 5x fewer false alarms
- Deploys in weeks without new hardware investments
