

Turn your existing CCTV cameras into AI operators and boost store performance.

Using **existing CCTV cameras**, ShopperAI delivers real-time visibility into shelf availability, planogram compliance, shrink exposure, and floor issues.

Helping retailers **protect revenue** and maintain **operational control** across every location.

IN SALES RECOVERY WITHIN JUST 30 DAYS

SHOPPERAI SOLUTIONS

On-Shelf Availability

Detects shelf gaps in real time. Immediate restocking signals to store teams.

Planogram Compliance

Validates shelf execution against planograms continuously. Upload & verify.

Out-of-Stock Alerts

Push notifications and dashboard alerts before shoppers walk away.

Floor & Safety Monitoring

Detects obstacles, spills, and hazards. Reduces liability and improves safety.

AGENTIC COMMERCE FOR CPG BRANDS

End-to-end, real-time visibility from on-shelf level to backroom inventory.

Seamlessly convert out-of-stock signals into fast, targeted action by your sales team.

HOW IT WORKS: 3 STEPS

01

Connect

We connect remotely to your existing CCTV. No new cameras, no on-site work, no downtime.

02

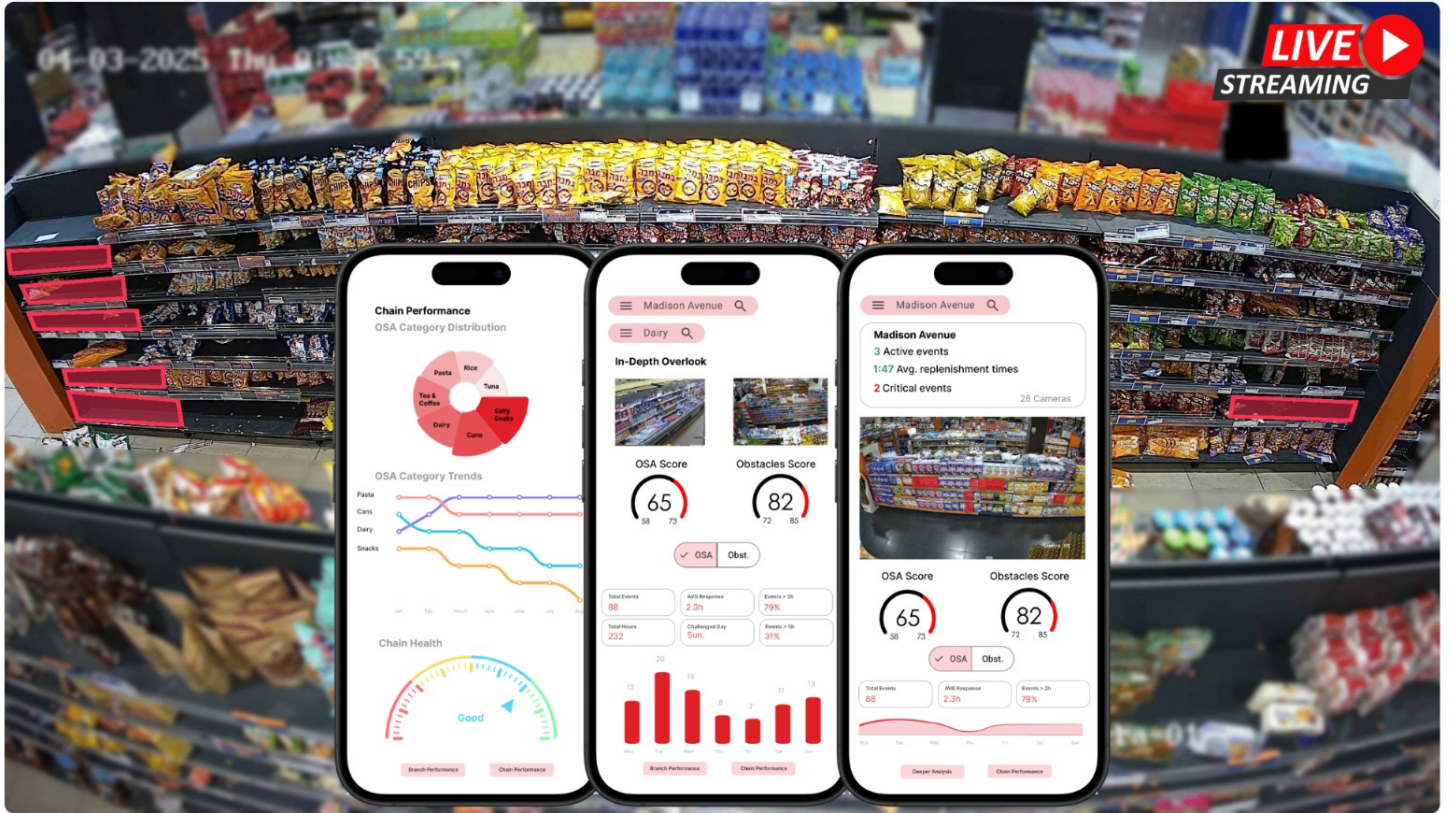

Analyze

Our AI processes shelf imagery every 60 seconds, detecting stockouts, compliance gaps, and hazards.

03

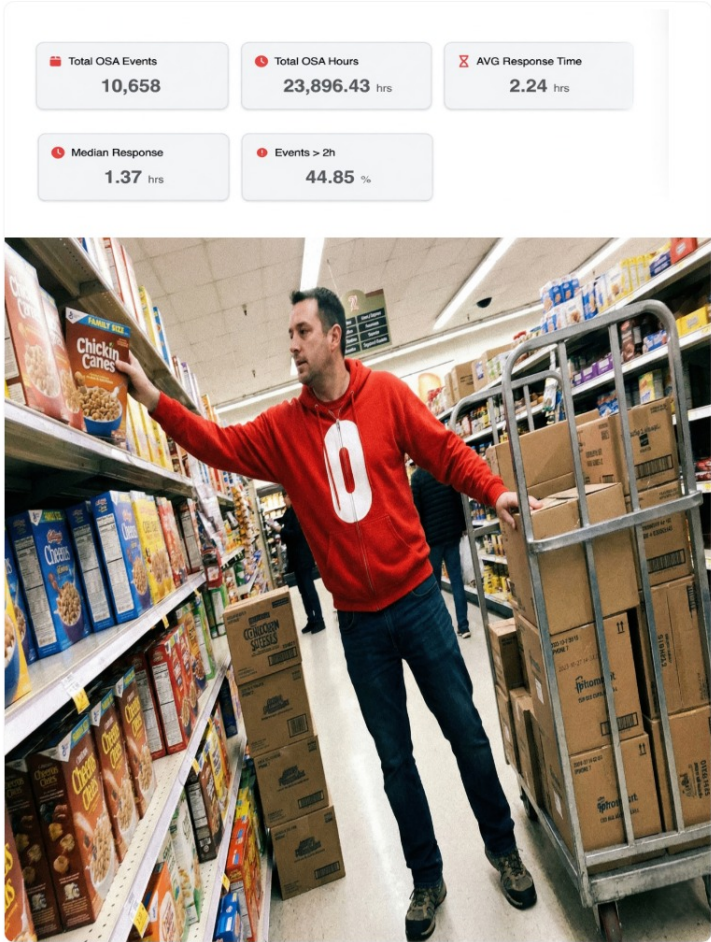

Optimize

Real-time alerts empower teams to act before revenue is lost. Measurable ROI from day one.

VIEW ALL KPIs, ANYWHERE, WITH THE SHOPPERAI LIVE DASHBOARD

See, at any given time and in one glance, all key performance categories for all branches in a consistent way.

WHY SHOPPERAI

- AI-only: no sensors, no hardware, no ugly installations
- \$0 capex: uses existing CCTV infrastructure
- 1¢ per camera per day: fraction of legacy costs
- Live in days: remote activation across all locations
- 24/7 coverage: every shelf, every minute
- Proven with leading retailers globally

COMPETITIVE EDGE

vs. Sensor-based systems

No installation cost. No shelf clutter. No maintenance contracts. 100x cheaper to deploy.

vs. Robot-based audits

Continuous 24/7 coverage vs. periodic scans. No floor footprint. No robot fleet management.

vs. Manual audits

Eliminates human error. Catches 100% of stockouts. Frees labor for higher-value tasks.
