

Activate License :-

Activate License

01. Online Activation: After purchasing Shoviv software, you will receive an email consisting of the **Order Number** and **Activation Key**. To activate the license, the user needs to enter the Order Number and Activation Key received after purchasing the product. Then click the Online activation button. Please ensure that the internet connection will properly work.

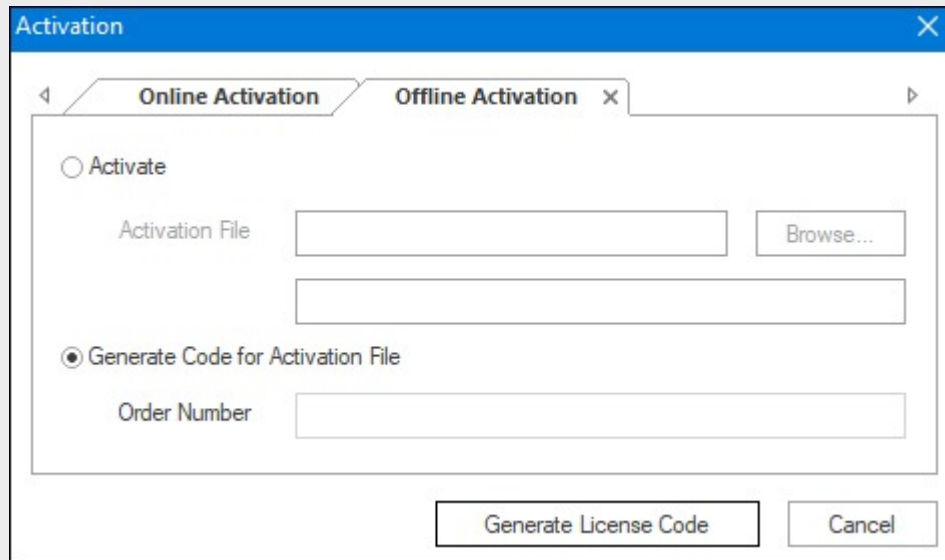

The screenshot shows a software dialog box titled "Activation". It has two tabs: "Online Activation" (selected) and "Offline Activation". Below the tabs are two input fields: "Order Number" and "Activation Key". At the bottom of the dialog are two buttons: "Online Activate" and "Cancel".

02. Offline Activation: If the online activation process gets failed or unable to activate the product due to some other reasons, then you can use the offline activation methods to activate the software. Offline activation has two steps.

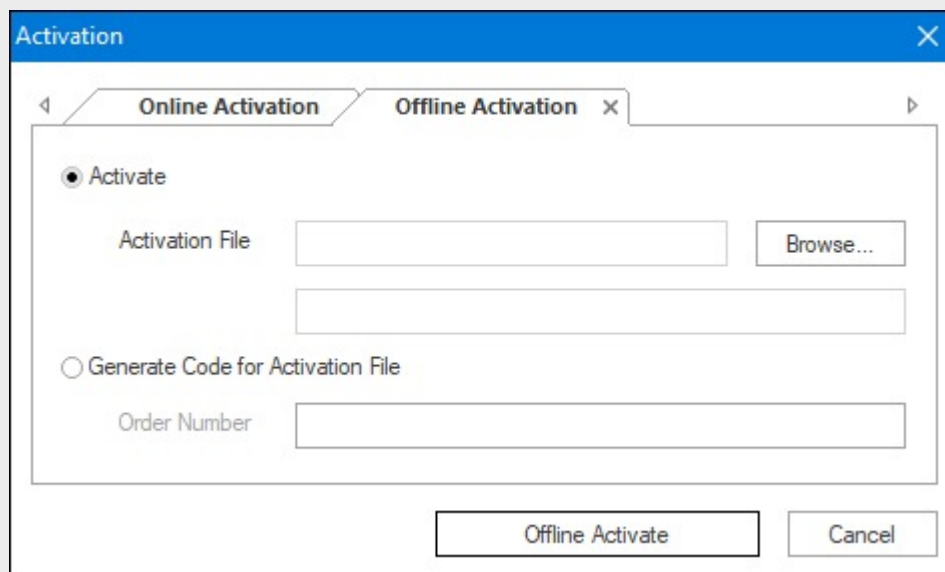

- **Generate Code for Activation file:** You need to enter the order number in the respective field and then click the generate license code button. A text file will

Using this file, we will generate an activation file and send it to you at your registered email address within a few minutes after receiving the email/request.

The screenshot shows a dialog box titled "Activation" with a close button (X) in the top right corner. It features two tabs: "Online Activation" (selected) and "Offline Activation" (with a close button X). Under the "Online Activation" tab, there are two radio button options: "Activate" (unselected) and "Generate Code for Activation File" (selected). Below "Activate" is a text input field labeled "Activation File" with a "Browse..." button to its right. Below "Generate Code for Activation File" is a text input field labeled "Order Number". At the bottom of the dialog, there are two buttons: "Generate License Code" and "Cancel".

- **Activate:** After receiving the activation file sent by Shoviv Software, all you need to do is go to offline activation and browse the activation file and click the **Offline Activate** button.

The screenshot shows the same "Activation" dialog box, but now the "Offline Activation" tab is selected. The "Activate" radio button is selected, and the "Generate Code for Activation File" radio button is unselected. The "Order Number" text input field is now empty. The "Offline Activate" button is visible at the bottom of the dialog, along with the "Cancel" button.
