

Salient Features of Shoviv GroupWise to Exchange Migration Tool:

Fast Migration Process

The tool has a user-friendly interface and has been designed with the advanced algorithm in order to execute the fastest data migration from GroupWise to Exchange Server/Office 365. You can migrate multiple mailboxes in one processing without slowing the process.

Migrate GroupWise to Office 365

Besides this, it also helps the users for [GroupWise to Office 365 Migration](#). The user needs to use Office 365 Admin credentials to fetch all Office 365 mailboxes, ensure that all Office 365 mailboxes have full access rights of the selected Admin user to perform the migration. User can also migrate GroupWise Mailbox into Office 365 Public Folder & Archive Mailbox.

GroupWise to PST

User can export Single as well as multiple GroupWise Mailboxes into Outlook PST files at once. User can choose to create Unicode or non-Unicode PST file at the time while exporting. If GroupWise mailbox size is very large then the user can use the "Split PST file" option to split GroupWise mailbox data into multiple small PST files depends upon their requirement.

GroupWise to EML & MSG

The software not only helps for migration of GroupWise to Exchange Server & Office 365 but also allows the users to save the data in other file formats such as MSG and EML into a local directory. Users can use this option as per the need as EML and MSG are widely used file formats.

Allow Data Screening Before Migration

Before attempting the final data conversion, it allows taking the preview of your data and its properties within the tool. This feature comes very handy when the user wants to ensure the correctness of data that are migrating.

Different Connectivity Options

To establish connectivity with GroupWise, the software offers different options i.e. Default, Online, Include Proxy, Caching Mailbox Path and Remote Mailbox Path. The options can be used according to the situation and requirement.

Migrate GroupWise to Live Exchange

Shoviv GroupWise to Exchange Server also migrates GroupWise Mailboxes into Live Exchange Server Mailboxes. At the time of migration, one can map GroupWise mailboxes to target Exchange Server Mailboxes automatically or manually. Apart from this, one can migrate GroupWise mailbox in to Live Exchange server Archive Mailbox, Public Folder as well.

Export GroupWise to Outlook Profile

If the user has an Outlook profile of Live Exchange Server, Office 365 or any other IMAP/POP account, then the user can also migrate GroupWise Multiple Mailboxes & Single Mailbox data into selected profile email client as well as migrate into Archive Mailbox & Public Folder.

Folder Mapping Option

At the time while migrating from GroupWise Mailboxes to PST/Live Exchange Server/Office 365, users can use Folder Mapping options. This option helps the users to change the name and location of the source and target folder. Using this option, users can simply migrate particular mailbox items to the specific mailbox of the target.

GroupWise Items Filter

This option helps the users to filter items based on the given filter criteria. Using Shoviv Exchange Migration Tool, the user can filter items based on the Item Type and Message Date. This option comes very handy when users want to migrate only particular data.
