

AGENDA

Day 1

Module 01 × Manage identity and access

Lo1: Configure Azure Active Directory (Azure AD) Privileged Identity Management (PIM)

Lo2: Configure Azure AD for Azure workloads and subscriptions

Lo3: Configure security for an Azure subscription

Module 02

Implement platform protection

Lo1: Understand cloud security

Lo2: Build a network

Lo3: Secure the network

Lo4: Implementing host security

Lo5: Implementing platform security enhancements

Lo6: Implement subscription security

Day 2

Module 03 × Secure data and applications

Lo1: Configure security policies to manage data

Lo2: Configure security for data infrastructure

Lo3: Configure encryption for data at rest

Lo4: Understand application security

Lo5: Implement security for application lifecycle

Lo6: Secure applications

Lo7: Configure and manage Azure Key Vault

Module 04

Manage security operations

Lo1: Configure security services

Lo2: Configure security policies by using Azure Security Center

Lo3: Manage security alerts

Lo4: Respond to and remediate security issues

Lo5: Create security baselines
