teamplay™ Protocols - Connect, compare, collaborate on Microsoft Azure

Join the imaging world team. teamplay™ by Siemens Healthineers.

teamplay™ from Siemens Healthineers is a cloud-based collaborative network that brings together healthcare professionals in order to advance medicine and human health as a team effort. By connecting medical organizations and their imaging devices, teamplay™ aspires to create the biggest virtual imaging team in the world and provides its members with tools to tackle big data and the challenges of increasing cost pressure.

Now on Microsoft Azure.

teamplay™ helps you to securely connect, compare, and collaborate. Connecting to the teamplay cloud on Microsoft Azure gives you instant access to data from all your imaging devices for faster decision-making based on reliable, well-structured, and up-to-date information. Comparing performance data to peer institutions helps you to maintain competitive standards. There are four modules currently available on teamplay™ - Dose, Usage, Protocols, and Images. Protocols helps you monitor, analyze, and optimize imaging protocols across your entire imaging fleet. Send efficient protocols to compatible scanners straight from the distribution panel.

teamplay™ Protocols

✓ **Protocols in one place** – Protocols gives you a clear picture of protocols installed in your imaging fleet. Tidy, interactive grids make exploring protocols as easy as a tapping on your tablet. Find imaging protocols in one place. The viewer lets you analyze their details. Focus on a particular scanner (CT) in your fleet, and browse its protocol tree.·

✓ **Analyzing and optimizing –** The challenges for your imaging fleet change over time, and so do protocols. teamplay makes it easy to identify best-practice protocols and use them to optimize your workflow. To keep track of recent improvements, simply explore the version history. Add annotations for later reference, and distribute protocols with accompanying notes.

✓ **Streamline protocol roll-outs –** Send particularly efficient protocols to compatible scanners in your fleet, straight from distribution panel. Save time and resources in your fleet network by distributing protocols remotely.

✓

Additional teamplay™ Modules

Dose   Monitor patient dose levels from imaging devices and identify areas of improvement to build best practice exams. Current dose levels and deviations from institutional and national references are displayed with events notifications of exams that have exceeded dose limits.

Usage Monitor the performance of your imaging fleet and track workflow efficiency to optimize imaging performance in your institution.

Images Collaborate on scanner images in a secure environment to help improve patient outcomes. View and add to discussions on shared images from your tablet – as easily as you send a text.

> "The beauty of teamplay is in its graphic interface, that very intuitively provides all key information."
> *Dr. Schellhammer, Head of Radiology, Krankenhaus der Augustinerinnen, Germany*

teamplay™ Protocols - Connect, compare, collaborate on Microsoft Azure

Join the imaging world team. teamplay™ by Siemens Healthineers.

teamplay™ Has the Answers

- ✓ Gain fast, near real-time data insights
- ✓ Securely access and monitor your transparent key metrics, from dose levels to performance, in one place.
- ✓ Standardize workflow and quality of care
- ✓ Turn improving efficiency into a secure, smooth, and swift process.
- ✓ Balance business and patient satisfaction
- ✓ Compare[2,3] your performance in teamplay's protected cloud environment. Learn how peers realize sustainable trade-offs.
- ✓ Enjoy the simplicity of clean design
- ✓ teamplay comes with a single clean and simple user interface for all your imaging and performance data needs. Access, monitor and compare your KPIs anywhere and anytime[4], from your desk or on the go.

Microsoft Cloud in Health

Health organizations can benefit from Microsoft's industry-leading approach to security, privacy, and compliance while minimizing cost and complexity. With Microsoft, organizations get:

- ✓ Adherence to health compliance standards including HIPAA BAA, ISO 27018 and EU Model Clauses.
- ✓ Easy access to cloud resources on demand
- ✓ Help with reduced medical-image storage costs
- ✓ Transparent management of corporate identities

Visit www.Microsoft.com/health to read more about the Microsoft Cloud in Health and http://azure.microsoft.com/en-us/support/trust-center/compliance/ for specifics on our world class Azure specific certifications.

Join the imaging world team of teamplay™ to accelerate your clinical processes – when you need it..
