

Deliver innovative E/E systems ahead of your competitors

ABOUT Capital

Capital is the leading comprehensive E/E systems development solution for companies across industries, of all sizes. Built on the latest technologies, we enable digital transformations to develop products of the future faster.

See what customers are saying:

"Our partnership with the Siemens team will combine best-in-class electrical design tools with Boeing's vast experience and knowledge in our 2CES transformation of electrical design."

*— John Harnagel,
Engineering Director, Boeing Defense and Space*

WHAT WE OFFER

The unmatched breadth and depth of Capital with Azure Cloud scalability, affordability and security solves more of the tough challenges required to develop highly successful products.

Take control of your E/E system design processes with a comprehensive E/E systems development solution. Efficiently design, engineer and validate complex products in the context of a digital twin in a way that meets your business needs.

Easily add functionality, manage users and provision infrastructure to expand your global footprint. Protect your IP with Azure's highly secured perimeter and data protection

Accelerate E/E systems development and manufacturing with greater collaboration powered by Capital and Azure Cloud.

Why Capital and Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
