

Explore, Analyze, and Decide with Sigma

Cloud-native Analytics Built for Modern Business

Work with billions of rows of data quickly & easily

The screenshot shows the Sigma interface with a 'PAGE ELEMENTS' sidebar on the left containing options like 'Section', 'Regional Sales', and 'Dashboard Title'. The main area displays a spreadsheet with columns for ID, Date, Time, and Code. Below the spreadsheet is a bar chart titled 'Ev...rity' with categories like 'FB - Q4 Main', 'FB - Success Series 1 - CPM - LE', 'GOOG - Insights - CPC - TR', and 'GOOG - Q4 Main - CPC - TR'.

Easy to use, widely adopted

It's no surprise that the average "adoption rate" for analytics is 25% when the tools are so hard to use. Not Sigma. We're built the way you think—in spreadsheets.

Why Sigma?

Sigma is an exploratory analytics platform that connects to your cloud data warehouse in minutes. Its familiar spreadsheet-like user interface breaks down data silos across your organization, enabling your teams to unlock the power of their data and align their decision-making. Data teams are no longer backlogged by business requests and business users feel comfortable developing "what if" analyses. With Sigma, no SQL or special training is required to get started.

- 1 Get Instant Value from Your Data** Sigma connects to your data warehouse in minutes without the need to write code.
- 2 You Already Know How to Use Sigma** Approximately 1B people today use the same interface as Sigma—the spreadsheet.
- 3 Use All The Data for Analysis** Use all your data for analysis, not just averages and rollups. Drill down without predefined limits.

"The speed, scale, and ease-of-use of Sigma helped us to reduce our time-to-insights by 93%."

Jessica Nielsen
Data Analytics Manager, Scripps

Built for the Modern Data Stack

- Connect Instantly** Code free connectors to your data sources from databases, applications, files, and tables.
- Design Together** Align engineering and business with visual builds.
- Embed Analytics** Deliver analytics easily inside or outside your business.
- Explore Freely** Investigate your data without predefined limits just as you like to.
- Team Up** View, edit, and build together in real-time across geographies.

Investors

Explore, analyze, and report on massive live datasets and leverage your Data Warehouse's data governance within Sigma

Enterprise-grade Security Built for Your Chief Security Officer (CISO)

With Sigma, your data never leaves the data warehouse. No extracts, no caching, no data in transit, nothing. Everything stays where it belongs and all operations are executed inside the warehouse.

You also get row-level and role-based security to make sure that the right data goes to the right person. We support key security protocols like GDPR, SAS70, AWS Private Link, HIPAA, Privacy Shield, CCPA, CSA, SOC 3, SOC 2 Type II, and SOC 1 Type II.

Sigma is a cloud analytics platform that uses a familiar spreadsheet interface to give business users instant access to explore and get insights from their cloud data warehouse. It requires no code or special training to explore billions of rows, augment with new data, or perform “what if” analysis on all data in real-time.
